2013 Revision

Information on Revised Population Estimates and Projections

Tennessee Department of Health

Division of Policy, Planning and Assessment, Office of Health Statistics

June, 2013

The Division of Policy, Planning and Assessment, Office of Heath Statistics has revised its population projections series effective June, 2013. This 2013 revision updates Tennessee Population Projection data to be compatible with the University of Tennessee Center for Business and Economic Research (UTCBER) projections series available at that time. These data were interpolated and reassembled from the UTCBER data in order to obtain the level of detail needed in Health Statistics work which often requires single year of age estimates as well as estimates for each calendar year. Summary data presented here will not match that of UTCBER exactly due to rounding procedures performed during the interpolating processes. They should be very close to similar UTCBER summary data, however.

Previous projections series projected data by total, white male, white female, black male, black female, other male and other female. This level of racial demographic detail is not included in this current series. The data presented herein are projected by total, male, and female gender detail. Data in these tables have been aggregated to five year age cohorts for data presentation. More detailed single year of age data are available in an electronic format and may be obtained by contacting the Statistical Service unit within the Office of Health Statistics: Data Request Line: 615-741-4939; E-Mail Requests: HealthStatistics.Health@tn.gov .
