December 2015

INTRODUCTION

This publication provides statistical information to planners, educators, and employers regarding high school graduates in Tennessee. The data in High School Graduates 2015 are presented in a county summary table followed by statewide totals. Individual county tables are presented alphabetically.

The Tennessee Department of Labor and Workforce Development, in cooperation with the Tennessee Department of Education, surveys all schools that have enrollment in grades 9-12 and that qualify to award a state of Tennessee diploma upon graduation. This year, schools were given the opportunity to participate using a dedicated survey Web site, by e-mail, or by mail. This survey includes all public schools, accredited private schools, and special schools in the state. It excludes home schools, charter schools, and schools with accreditation not recognized by the Department of Education. The following tables list the number of schools and response rates as well as the number of graduates, their educational intentions, and current work plans or military service, if appropriate.

Special thanks are extended to school administrators and counselors who took time to answer this survey. Their cooperation will benefit the educators, employers, and planners who use this publication.

HIGHLIGHTS

Tennessee's 2014-2015 graduating class attended the state's 408 public and private high schools. There are 26 city or independent district public high schools, 296 county high schools, 83 private high schools, and three state special schools that constitute the universe of this survey. The special high schools are for the vision and hearing impaired. For the third consecutive year there have been changes in the schools in Shelby County. There were five independent school districts that were created from the 2013-2014 county school district. These new districts had five schools that are reported, in 2015, as city schools. This survey includes all accredited high schools that had students who qualified for a state of Tennessee diploma. Of the schools that responded to the survey, 79.7 percent of their graduates plan to continue their education.

Private schools graduated only 9.1 percent of all state graduates, but 98.5 percent of these graduates plan to continue their education. City and county schools graduated 90.6 percent of all graduates and 77.8 percent of these graduates plan to continue their education. The state special schools account for the remaining 0.3 percent of graduates. The four largest counties (Davidson, Hamilton, Knox, and Shelby) accounted for 33.9 percent of all Tennessee graduates and 36.4 percent of all graduates continuing their education.

The 2015 response rate for the 143 schools in these four large counties was 79.7 percent, the highest since 2011 when the response rate was 82.1 percent. This high response rate included a rate of only 68.4 percent in Shelby County. The response rate in 2014 was 78.5 percent and 73.3 percent in 2013. Schools in the remaining 91 counties, including the special schools, responded at a rate of 86.8 percent with 76.6 percent of graduates planning to continue their education.

The highest percentage of graduates continuing their education in counties with more than two schools responding were Hamilton County (89.0 percent), Williamson County (87.7 percent), Bradley County (87.6 percent), Carter County (87.4 percent), Wayne County (87.1 percent), Carroll County (87.0 percent), and Sevier County (86.5 percent). Counties with a high percentage of students continuing their education and few schools include Pickett County (100.0 percent), Henderson County (93.7 percent), Trousdale County (93.3 percent), Perry County (91.8 percent), and Grainger County (91.4 percent). The counties that had less than one-half of their graduates continuing their education were Giles County (38.5 percent), Grundy County (39.0 percent), Hancock County (46.2 percent), Dickson County (48.5 percent), and Union County (49.5 percent). The last year that Hancock County had more than 50 percent of their graduates continuing their education was in 2009. Dickson County had fewer than 50 percent in four of the last five years. There were five counties that had no schools responding. They were Bledsoe, Hardin, Lewis, Moore, and Sequatchie. Hardin and Lewis counties had no responses to this survey for the second consecutive year while Sequatchie County has not responded for three consecutive years. Moore County has not responded in three of the last four years.

Four more schools responded this year for a total of 344 schools (84.3 percent). These figures are not absolute measures; they represent the **intentions** of the 2014-2015 graduates. All data in this publication are **preliminary** accounts.

Graduates who did not fit into the categories of continuing their education, entering the labor force, or entering the armed forces were listed in the category of “other.” These categories may not add to total graduates as some students are reported in more than one category (i.e., continuing education and entering the labor force).

N/A represents “not applicable” and is used when we did not receive any survey responses for a particular county. Schools that responded to the survey but had no graduates will have zeroes in the data column but will be counted as a responding institution.
