

PRESCRIBED FIRE

With detailed planning and careful preparation, an experienced Burn Boss creates a detailed prescription and burn plan, assembles an experienced Burn Crew, and carries out a safe, effective, and managed prescribed fire that minimizes impact to the public and surrounding areas.

3. EXECUTING THE BURN

On burn day, the Burn Boss ensures the burn is implemented according to the burn plan to ensure objectives are met while providing for the safety of firefighters and the public.

A small test fire is conducted to determine if fuel and weather conditions allow for a safe and effective burn.
