

No I disagree with the opinion that modern movies and video game have contributed to the rise of violent crime in the United States. Because if the people are agree with this opinion the United States is going to be a violent and crime.

All the people childrens can be violent and get crime. That what no is good for the United States.

My first reasons eye deflection not enough for healthy get sick. If the people watch movie or play video game is going to be a problem for them. things can make their children violent because some movie are of action and that no is good for they. They could not get enough exercise, and they can't be healthy.

**G-1****Score Point: 1**

This response reflects fundamental deficiencies in persuasive writing skills. The writer does not agree with the statement that violent movies and video games have contributed to the rise of violent crime in the United States. However, serious and persistent writing errors impede the writer's meaning and result in a response that is largely incoherent.
