

HIT – Health Information Tennessee Website

Tennessee Department of Health

HIT site - Health Information Tennessee

<http://hit.state.tn.us/>

The HIT site features:

[Data Query](#) – here you form your own questions (queries) and have immediate access to official state of Tennessee data/results. You can select your own variables and display the results in a variety of ways, such as graphs, charts, plots, trends, or tables. The results can be further divided by county, region, statewide, race, sex, age and more. You can view, download or print the results.

[Tables and Reports](#) – access and view, download or print pre-selected standard statistical tables or Tennessee health-related reports.

[County Profiles](#) – presenting county health priorities, community health status reports and tables; demographics; other selected tables and reports for each of Tennessee's 95 counties.

For more health information in Tennessee, please visit their companion web sites:
