Programs highlighted were also identified as low producing during the 2005 review. Review was based on degrees awarded from 2002-03 to 2004-05.

In the 2008-09 Academic Audit report, “the team recommended that faculty and administrators seriously examine the need for continuing the Social Services program given its low number of graduates and the change in Head Start hiring requirements. The program was initially designed to provide students with the necessary associate degree to obtain employment with Head Start. However, Head Start has recently changed its hiring requirements from an associate to a bachelor’s degree. The audit process revealed students may be better served to pursue a transfer degree in behavioral sciences or a viable career program with a social service emphasis.” (Audit team members represented community college faculty members from Chattanooga and Roane)
