1	I wanted to double check the estimated volume as the UOM listed is "hundred" and qty is 25,000. The QA statement confirms this as an average of 40 rolls per month, but a 25,000 cwt would equal 2.5M lbs. Can you please confirm? The average weight of one roll of 18" 60/24" paper is ~1K lbs.	The State gets 25,000-45,000 pounds per month on allocation from the mill. We are billed by CWT. Shipped material weight/100=CWT * cost per unit. Example, if we receive 42500 pounds in material, we are billed 425 CWT at a rate of \$100/cwt = \$42,500 invoice.
