**How to add trusted sites in Chrome using Internet Options**

Windows OS users can quickly add trusted sites to their Chrome browser using the built-in Internet Options in Control Panel. You can manually add sites to the list of **Trusted Sites**, and that list will apply to all the browsers you use, including Chrome.

1. Click on the **Start** menu, type *internet options*, and select the **Internet Options** app.

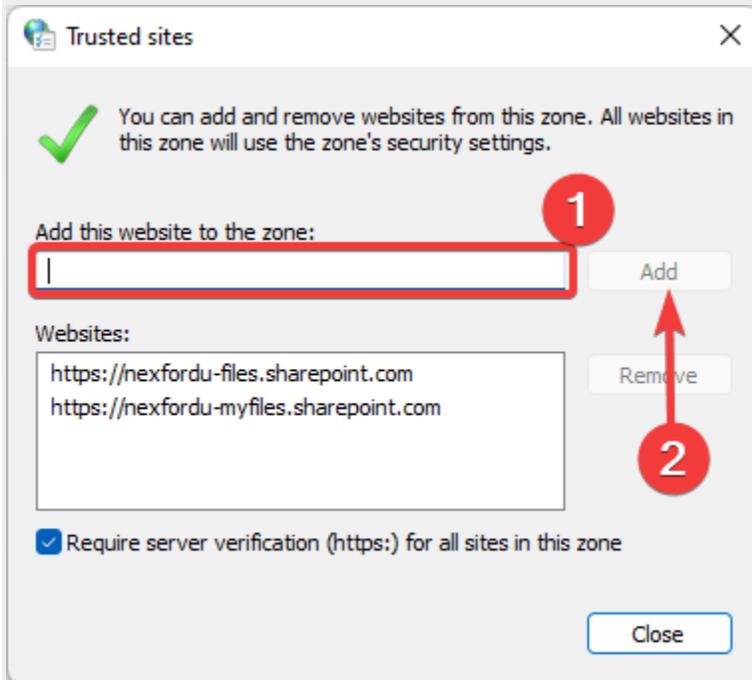

2. Navigate to the **Security** tab, then select **Trusted Sites** (the icon with a green check mark).

3. Click on **Sites**.

4. On the new window, type the URL
"https://www.tn.gov/content/tn/humanservices/for-families/child-support-services/child-support-guidelines/child-support-calculator-and-worksheet-1.html "of the site you want to add to trusted sites in the **Add this website to the zone** text field.

5. Click the *Add* button.
6. Close the window when you finish.
