**Note 1 - Summary of Significant Accounting Policies**

The state prescribes the use of the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) in effect for the accounting periods covered in the financial statements.

1-8. No significant differences exist between the statutory practices prescribed or permitted by the State of Illinois and those prescribed or permitted by the NAIC SAP which would materially affect the statutory basis capital and surplus.

## NOTES TO FINANCIAL STATEMENTS

---

### **Note 20 – Fair Value Measurement**

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

*Level 1* — Quoted (unadjusted) prices for identical assets in active markets.

*Level 2* — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets
- Quoted prices for identical or similar assets in inactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.)
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.)
- Inputs that are derived principally from or corroborated by other observable market data

*Level 3* — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds and short-term investments are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. Based on the Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services, the Company has not historically adjusted the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

There were no transfers between Levels 1 and 2 as of March 31, 2011 and December 31, 2010.

The Company does not have any financial assets that are measured and reported at fair value on the statutory basis statements of admitted assets, liabilities, and capital and surplus at March 31, 2011 and December 31, 2010.

The Company does not have any financial assets with a fair value hierarchy of level 3.

### **Note 21 - Other Items**

The Company recorded receivables related to retroactive policies and estimated withholds of approximately \$33,092,000 and \$2,160,000 as of December 31, 2010 for TennCare Medicaid and CHOICES, respectively. As of March 31, 2011, the Company has collected \$34,207,000 and \$7,597,000 in Medicaid and CHOICES retroactive premiums and estimated withholds related to prior year, respectively. Currently, there is approximately \$8,496,000 and \$36,000 in retroactive receivables and estimated withholds recorded for the prior year for TennCare Medicaid and CHOICES, respectively. The amounts above exclude activity related to the rate change accrual.

The Company elected to use rounding in reporting amounts in the notes to statutory basis financial statements.

**Note 24 - Retrospectively Rated Contracts & Contracts Subject to Redetermination**

The Company has Medicare Part D program business that is subject to a retrospective rating feature related to Part D premiums. The Company has estimated accrued retrospective premiums related to certain Part D premiums based on guidelines determined by the Center for Medicare and Medicaid Services (CMS). The formula is tiered and based on the bid medical loss ratio. As of March 31, 2011, the amount of Part D premium subject to retrospective rating was approximately \$20,047,000 representing 2.1% of total net premiums written.

The Company has a contract with the federal government through the Office of Personnel Management to administer the Federal Employees Health Benefit Program (FEHBP). The Company is subject to rate adjustments through audits by the Office of Personnel Management. As of March 31, 2011, the amount of earned premiums subject to redetermination was approximately \$4,610,000, representing 0.5% of total net premiums written.

**Note 25 - Change in Incurred Losses and Loss Adjustment Expenses**

Changes in estimates related to the prior year incurred claims are included in total hospital and medical expenses in the current year in the accompanying statutory basis statements of operations. The following tables disclose paid claims, incurred claims, and the balance in the claims unpaid, accrued medical incentive pool and bonus amounts, aggregate health claim reserves and health care receivables at March 31, 2011 and December 31, 2010 (in thousands):

The liability for claims unpaid, accrued medical incentive pool and bonus amounts, aggregate health claim reserves and health care receivables at December 31, 2010 and December 31, 2009, exceeded actual claims incurred through March 31, 2011 and December 31, 2010, respectively, related to prior years by approximately \$56,684,000 and \$11,205,000, respectively. In 2011, the favorable development is primarily due to approximately \$45,379,000 in retroactivity for inpatient, outpatient, pharmacy claims and claims settlement payments, in addition to favorable developments related to the release and re-establishment of approximately \$19,166,000 in known environmental claims reserve. Included in this increase, the Company experienced approximately \$1,359,000 of favorable prior year claim development on retrospectively rated policies. However, the business to which it relates is subject to premium adjustments.
