APPENDIX I. THE TENNESSEE GASOLINE TAX, A MINI-CASE STUDY.....200

Appendix A. State-Shared Revenue Sources: Definitions and General Information

Sales and Use Tax

The retail sales and use tax, imposed in 1947, immediately became the state's largest single revenue source. The major purpose in enacting the sales tax was to provide for state and county education programs. The current state sales and use tax rate is six percent and is applied to the sale, use, consumption, distribution, lease, or rental of tangible personal property and of selected services.¹

Gasoline Tax

The gasoline tax was first imposed by the legislature in 1923. The current tax rate is \$.20 per gallon. The gasoline tax is the largest shared revenue source for combined county and municipal governments. Shared gasoline tax revenues are restricted to funding street and road construction and mass transit systems.²

Motor Fuel Tax

The motor fuel tax was enacted in 1941. The tax is imposed on the sale of diesel fuel and alternate vehicle fuels. The tax is \$0.17 per gallon. The state highway fund receives 66.8 percent, state general fund receives 1.2 percent, counties receive (for their highway fund) 21.3 percent, and municipalities receive 10.7 percent.³

Gasoline Inspections Tax (Special Petroleum)

The gasoline inspection tax was enacted in 1899 for the purpose of assuring that gasoline and oil sold in the state met minimum quality standards. The tax was reenacted on January 1, 1979 and imposed at a rate of \$0.01 for each gallon of gasoline and other volatile fuels sold, used, or stored. The state highway fund receives 98 percent of the net collections and the general fund receives two percent. However, before the revenue is distributed, an annual amount of \$12,017,000 is to be set aside monthly to a local government fund to be spent solely for county roads and city streets.⁴

Hall Income Tax

The Hall Income Tax was enacted in 1929 and is levied on certain types of dividend and interest income from stocks and "bonds" as broadly defined in the Tennessee Code Annotated (TCA) Section 67-2-101. The current six percent income tax rate applies only to taxable income received by Tennessee residents – including fiduciaries, administrators, executors, guardians, trustees, partnerships, and associates. The first \$1,250 of each individual's dividend and interest income (\$2,500 on joint returns) is exempt from the Hall Income Tax. Blind persons, certain quadriplegics, pension trusts, profit sharing trusts, and trustees of charitable remainder trusts are

³ *Ibid.*, p. 25.

⁴ *Ibid.*, p. 30.

exempt from the tax, as are persons 65 years or older whose earnings from all sources is less than \$16,200 (\$27,000 on joint returns).⁵

Gross Receipts Tax – TVA Replacement Revenue

Since 1937, there have been numerous alterations in Tennessee's gross receipts taxes. The largest single portion of reported gross receipts taxes comes from the Tennessee Valley Authority (T.V.A.) payments to Tennessee. These payments are required by federal law and are based on T.V.A. power sales in Tennessee. All gross receipts taxes collected by the Department of Revenue, with the exception of T.V.A. payments, are apportioned to the general fund. T.V.A. payments are shared between the state general fund and county and municipal governments.⁶

Beer Excise Tax

The beer excise tax, also referred to as the beer barrelage tax, was enacted in 1933. In 1981, the rate was increased to \$3.90 per barrel (31 gallons). In addition to the barrelage tax, registration fees are levied. Beer tax revenue from the barrelage tax is divided among state and local governments. The state general fund receives about 67 percent, local governments 20 percent, and the litter control program 13 percent.⁷

Beer Wholesale Tax

This excise tax was enacted in 1953. It is a 17 percent excise tax on the wholesale price collected by the wholesalers from retailers. Approximately 96.5 percent of this tax is distributed to city or county governments on the basis of the situs of sales; 0.5 percent to the Department of Revenue for administration; and three percent to wholesalers to cover their collection costs.⁸

Alcoholic Beverage Tax

Chapter 40 of the Public Acts of 1939 authorized the sale of alcoholic beverages in counties and municipalities of Tennessee, if approved by a local referendum. Presently, the tax rate is \$4.00 per gallon on distilled spirits and \$1.10 per gallon on wine. An additional tax of 15 cents per case is levied on wholesalers for administration and enforcement expenses. In addition, licenses and permits are reissued annually by the Alcoholic Beverage Commission at the following rates: manufacturer, \$1,000; wholesaler, \$1,000; retailer, \$500; winery, \$50; manufacturer's representatives, \$50; wholesaler's representative, \$10; and employee's permit, \$2. The revenue collected from these sources is apportioned according to statutory formulas with approximately 83 percent going to the state general fund and 17 percent to counties.⁹

Corporate Excise Tax

The excise tax was the first of the Tennessee corporate taxes to be enacted (1923). The present rate is six percent of Tennessee net earnings. All corporations, for-profit cooperatives, joint stock associations, business trust, state banks, national banks, and savings and loans must pay the excise

⁶ Ibid., p. 21.

⁷ Ibid., pp. 15-16.

⁸ Ibid.

⁹ Ibid., p. 13.

tax annually on the net earnings from business done in the state. The net earnings of a corporation do not include dividends received from any other corporation if at least 80 percent is owned by the taxpayer.¹⁰

Mixed Drink Tax

The Mixed Drink Tax was enacted in 1967. It is a combination of two separate tax levies: (1) an annual licensing requirement, and (2) a gross receipts tax of 15 percent of the sale price of all alcoholic beverages sold for consumption on the premises. The revenue received from the license fee goes entirely to the general fund, while the gross receipts collections are apportioned as follows: 50 percent to the state general fund earmarked for education, 50 percent to the county or city in which sales were made.¹¹

Crude Oil and Natural Gas Severance Tax

A severance tax on crude oil and natural gas was imposed in 1943. In 1982, the rate was increase to three percent of the sales price of severed oil and natural gas in the state. Of the revenues collected, one-third is returned to the county from which the product was served. The remainder of the tax is allocated to the state general fund.¹²

Coal Severance Tax

The coal severance tax rate is \$0.20 per ton of severed coal in the state. All revenues collected from the \$0.20 tax, less three percent and all penalties and interest collected, are returned to that county in which the coal products were severed for the following specific purposes: one-half for the county educational system and one-half for highway and stream cleaning systems of that county.¹³

Source: Tennessee Department of Revenue.

Note: Due to security concerns related to the low volume of filers, this table does not include distributions for coal or gas severance taxes. The TN Malt Beverage Association reports all beer wholesale distributions for Metro Nashville-Davidson County under municipal distributions. See Appendix C-2.

Appendix C-2. Distribution by Municipality, by Source, 1999

Appendix C-2 provides the state-shared revenue amounts distributed by the state to municipal governments, by state-shared source, for Fiscal Year 1999. The Department of Revenue reports the gasoline tax and the motor fuel tax as one category. Not reported here is the alcoholic beverage tax; municipalities received a combined amount of approximately \$1,000 from this tax in FY 99.

Appendix C-2. 1999 Municipal Fund Distribution

Note: The TN Malt Beverage Association reports all beer wholesale distributions for Metro Nashville-Davidson County under municipal distributions.

Source: Tennessee Department of Revenue. Totals shown here do not include distributions reported by the Dept. of Revenue under the category "municipal" that do not go directly to municipalities.

Appendix C-3. Sums of State-Shared Tax Distribution by County Area, by Source, 1999

Appendix C-3 provides the state-shared revenue amounts for each source, excluding severance taxes (see note), with municipal and county government amounts summed for each county area, for Fiscal Year 1999.

Local Government	Corporate Excise Tax	Special Petroleum Tax	Mixed Drink Tax	Hall Income Tax	Gasoline & Motor Fuel Tax	Beer Excise Tax	Beer Wholesale Tax	Alcoholic Beverage Tax	TVA Payments	Sales & Use Tax	Total

Source: Tennessee Department of Revenue

Note: (pt.) denotes partials, cities that are located in more than one county. In this Appendix, TACIR staff has apportioned state-shared tax distributions to each city partial based upon the partial's proportion to the total city population. The source for the population data was the U.S. Census Bureau estimates for 7/1/98.

Totals shown here do not include \$2.5 million in distributions reported by the Dept. of Revenue under the category "municipal" that go to entities other than municipalities (i.e. CTAS, MTAS, UT Center for Government Training, and TACIR).

TN Malt Beverage Association reports all beer wholesale distributions for Metro Nashville-Davidson County under municipal distributions.

Due to security concerns related to the low volume of filers, this table does not include distributions for coal or gas severance taxes.

¹ Although Nashville/Davidson County is a metropolitan government, the Dept. of Revenue reports the city and county distributions separately.

² Although Lynchburg/Moore County is a metropolitan government, the Dept. of Revenue reports the city and county distributions separately.

Appendix C-4. Sums of State-Shared Tax Distribution by County Area, Totals, 1999

Appendix C-4 provides the state-shared revenue amounts for each source, excluding severance taxes (see note), with municipal and county government amounts summed for each county area, for Fiscal Year 1999.

Source: Tennessee Department of Revenue

Note: (pt.) denotes partials, cities that are located in more than one county. In this Appendix, TACIR staff has apportioned state-shared tax distributions to each city partial based upon the partial's proportion to the total city population. The source for the population data was the U.S. Census Bureau estimates for 7/1/98.

Totals shown here do not include \$2.5 million in distributions reported by the Dept. of Revenue under the category "municipal" that go to entities other than municipalities (i.e. CTAS, MTAS, UT Center for Government Training, and TACIR).

TN Malt Beverage Association reports all beer wholesale distributions for Metro Nashville-Davidson County under municipal distributions.

Due to security concerns related to the low volume of filers, this table does not include distributions for coal or gas severance taxes.

¹ Although Nashville/Davidson County is a metropolitan government, the Dept. of Revenue reports the city and county distributions separately.

² Although Lynchburg/Moore County is a metropolitan government, the Dept. of Revenue reports the city and county distributions separately.

Appendix C-5. Sums of State-Shared Tax Distribution by County Area, by Source, 1999, Ranked High to Low by County Area Total Distribution (Continued)

Local Government	Corporate Excise Tax	Special Petroleum Tax	Mixed Drink Tax	Hall Income Tax	Gasoline & Motor Fuel Tax	Beer Excise Tax	Beer Wholesale Tax	Alcoholic Beverage Tax	T.V.A. Payments	Sales & Use Tax	Total	Rank
Total to Local Governments	\$24,374,866	\$11,897,000	\$14,573,477	\$57,508,845	\$255,444,850	\$2,993,946	\$90,739,293	\$4,748,931	\$65,965,764	\$182,745,185	\$710,992,157	

Source: Tennessee Department of Revenue.

Note: (pt.) denotes partials, cities that are located in more than one county. In this Appendix, TACIR staff has apportioned state-shared tax distributions to each city partial based upon the partial's proportion to the total city population. The source for the population data was the U.S. Census Bureau estimates for 7/1/98.

Totals shown here do not include \$2.5 million in distributions reported by the Dept. of Revenue under the category "municipal" that go to entities other than municipalities (i.e. CTAS, MTAS, UT Center for Government Training, and TACIR).

TN Malt Beverage Association reports all beer wholesale distributions for Metro Nashville-Davidson County under municipal distributions.

Due to security concerns related to the low volume of filers, this table does not include distributions for coal or gas severance taxes.

¹ Although Nashville/Davidson County is a metropolitan government, the Dept. of Revenue reports the city and county distributions separately.

² Although Lynchburg/Moore County is a metropolitan government, the Dept. of Revenue reports the city and county distributions separately.

Appendix C-6. County Percent of Total State-Shared Taxes (FY 99) vs. County Percent of Total State Population, 1997

Appendix C-6 was adapted from a table prepared by the Joint Select Committee on Business Taxes for a draft addendum to their Final Report. The appendix shows the totals of state shared taxes to each county, the percent of total shared taxes to each county, the population of each county, and the percent of state population of each county. The county totals used in this comparison exclude the 17% beer wholesale tax and severance taxes. The comparisons between percent of total shared taxes and percent of total population are provided for general information only. Several factors can distort these comparisons, most notably the volatility of distributions of the income tax.

Appendix C-7. Municipal Percent of Total State-Shared Taxes (FY 99) vs. Municipal Percent of Total State Population, 1997

Appendix C-7 was adapted from a table prepared by the Joint Select Committee on Business Taxes for a draft addendum to their Final Report. The appendix shows the totals of state shared taxes to each municipality, the percent of total shared taxes distributed to each municipality, the population of each municipality, and the percent of state population of each municipality. The municipal totals used in this comparison exclude the 17% beer wholesale tax. The comparisons between percent of total shared taxes and percent of total population are provided for general information only. Several factors can distort these comparisons, most notably the volatility of distributions of the income tax.

Sources: FY 1995 data from Department of Revenue and State Comptroller's Office.

Distributions from the beer wholesale tax are excluded since, in the principal source document, *County and Municipal Finances For Fiscal Year Ended June 30, 1995*, local governments reported such collections as revenue from local sources. While gasoline and other highway fund taxes are shared with local governments, there were excluded from the analysis in this section in order to focus attention on the importance of shared taxes on general government finance (excluding highway and road finance).

Appendix E. An Analysis of Non-Motor-Fuel State-Shared Revenues to County Governments

Summary¹⁴

After having analyzed the shared revenues of a more discretionary nature to counties, it was found that loss of these revenues would have serious implications to county government finances and counties' abilities to provide services, especially in counties with more limited resources to generate additional revenues through local sources. The shared revenues include the following: bank excise tax, Hall income tax, state-shared payments in lieu of taxes from the Tennessee Valley Authority (TVA), and the state alcohol-related taxes including the beer tax, mixed drink tax, and the alcoholic beverage tax. Motor fuel-related taxes were not included because these shared revenues are required to be allocated to the county highway fund.

This analysis was accomplished by examining the allocation of these shared revenues to the various county fund types. The amounts are reported for most counties in county audit reports published by the Division of County Audit, Comptroller of the Treasury. A few counties use private accounting firms to conduct audits and the reports published by those counties were used as well. In the case of the four largest counties, including Knox, Hamilton, and Shelby, University of Tennessee County Technical Assistance Service (UT CTAS) field consultants obtained the information on allocation of the shared revenues analyzed here. Davidson County's information was unavailable.

It is generally perceived that state-shared revenues to counties are allocated mostly to general funds, and *overall*, that has been found to be the case as a result of this analysis. However, when analyzing each type of revenue, it was found that was not the case, nor was it true when considering *each county's* use of shared revenues. However, regardless of whether counties generally allocated shared revenues to their general funds, it must be noted that counties have specific legal requirements to provide a variety of types of services. These include the following services directly impacting county general funds and county general purpose school funds:

- **Education** *Construction and maintenance of school facilities.
Operation of schools.*
- **Public Safety** *Construction, operation, and maintenance of jail facilities and
medical care for prisoners.

Provide for Office of the Sheriff.

Construction and maintenance of courthouses.*

¹⁴ This Appendix is extracted from *An Analysis of Non-Motor-Fuel State-Shared Revenues to County Governments*, a report prepared by Lynne Holliday of the University of Tennessee County Technical Assistance Service, in support of this report.

Provide for Offices of Circuit Court Clerk, Clerk and Master, Juvenile Court, General Sessions Court and all related personnel.

Provide for emergency management.

Provide for a county medical examiner.

- **Administration** *Provide for other constitutional offices including the County Executive, County Clerk, Register of Deeds, Assessor of Property, and Trustee.*
- **Public Health** *Provide for facilities and maintenance of county health department*

Indeed, the findings of this analysis show that all counties ***do not allocate most state-shared revenues to the general fund, regardless of the essential services funded out of general funds as shown above that counties are required to provide by state law.*** This analysis includes the following findings that support this argument:

- ✚ Of the total amount of non-motor-fuel-related revenues of \$76 million distributed to counties, 58 percent were allocated by counties to the general fund while 30 percent were allocated to the general purpose school fund.
- ✚ On average, each county allocated 34 percent of their shared revenues, excluding motor-fuel-related taxes, to the general purpose school fund.
- ✚ The percentages of shared revenues allocated varied greatly, ranging from 0 percent to nearly 93 percent of total shared revenues allocated to the general purpose school fund. A total of 87 counties allocated some portion of shared revenues to the general purpose school fund.
- ✚ Furthermore, of total shared revenues, counties statewide allocated over 7 percent to debt service, a fund largely used to fund debt for school facilities.

With regard to the use of state-shared revenues by type of revenue, the analysis yielded the following findings:

- ✚ Of the total statewide ***bank excise tax*** distributed to counties, a total of 89 counties allocated 66 percent to the county general fund.
- ✚ Of the total statewide ***bank excise tax*** distributed to counties, a total of 56 counties allocated 20 percent to the general purpose school fund, with the next greatest amount of 8 percent going to debt service in 52 of the counties.
- ✚ Of the total statewide ***Hall income tax*** distributed to counties, a total of 85 counties allocated 87 percent to the county general fund. However, 12 counties allocated some

portion to the general purpose school fund. Four counties allocated 100 percent of their Hall income tax to the general purpose school fund. The average allocation for the 12 using the Hall income tax for schools was 68 percent.

- ✎ Of the total statewide *TVA payments* distributed to counties, a total of 68 counties allocated 47 percent to the general fund, with the next greatest amount of 40 percent going to the general purpose school fund in 61 of the counties. The average allocation among these 61 counties to the general purpose school fund was 65 percent of TVA payments. Furthermore, 28 counties allocated 10 percent of total statewide TVA payments to the debt service fund, presumed to largely fund school facilities, with an average allocation among these 28 counties at 23 percent of their TVA payments.
- ✎ Of the total statewide *alcohol-related taxes* distributed to counties, 73 percent went to county general funds in 93 counties, while the remainder was allocated to the general purpose school fund in 36 counties.

The overall fiscal impact to counties was analyzed in terms of fund balances in the county general fund and the general purpose school fund for the year ending FY 98 and yielded the following findings:

- ✎ Thirty-three (33) counties received non-motor-fuel-related shared revenues that were greater than 50 percent of their general fund balances.
- ✎ Fifteen (15) counties received non-motor-fuel-related shared revenues that were more than 50 percent of their general purpose school fund balances.
- ✎ Ten (10) counties would have an immediate general fund deficit without the non-motor-fuel-related shared revenues.
- ✎ Six (6) counties would have an immediate general purpose school fund deficit without the non-motor-fuel-related shared revenues.

Introduction

State-shared revenues are an important source of funding for services provided by counties in Tennessee. The gasoline and other motor-fuel-related taxes are clearly and directly linked to road building and maintenance since those shared revenues are required by state law to be used for those purposes. As for the remainder of the shared revenues, however, there is no clear link to determining the significance of them to the funding support for other types of county services. This is largely due to the discretionary nature of those revenues in state law. Therefore, the revenues examined in this analysis include the bank excise tax, the Hall income tax, shared payments in lieu of taxes from the Tennessee Valley Authority (TVA), and the various state alcohol-related taxes including the beer tax, the alcoholic beverage tax, and the mixed drink tax. All these revenues are distributed to be allocated either to the county general fund or unspecified

as to purpose with the exception of the state mixed drink tax, half of which must be expended in the same manner as the county property tax for education.

The mechanisms for determining the allocation of the non-motor-fuel-related revenues are the county audit reports, and in a few cases where private audits are conducted, UT CTAS field consultants obtained the information directly from county finance departments. The most current complete audit information available is fiscal year 1998. Predictably, a large portion of the state-shared revenues were allocated into the general funds of the counties in FY 1998, however, many counties used state-shared revenues to support other services such as schools, debt service and solid waste.

Although state revenue sharing is generally considered to moderate differences in revenue-generating capacity of local governments and enhance equity among them, this analysis does not address such policy issues or others that may be related to the statutory distribution of each of the types of shared revenues discussed. It simply serves to emphasize the importance of these revenues by presenting an overview on a county-by-county basis of how the funds are used.

For fiscal year 1998, the total distributions of the shared revenues are shown below:

Table E- 1. Selected State-shared Revenues for FY 98

Bank Excise Tax	\$12,310,166
Hall Income Tax	\$11,342,904
TVA Payments	\$42,294,726
Beer, Alcoholic Beverage and Mixed Drink	\$10,915,476
Total	\$76,863,272

Source: Tennessee Dept. of Revenue

For each county, the audit amounts reported as revenue from the above sources were compared with the amounts reported by the Dept. of Revenue (DOR). In most cases, audit totals from a particular state-shared revenue source matched the amount distributed as reported by DOR. However, in some cases, the amounts were different and an effort was made to determine the reason for the difference. Generally, the differences were not significant and probably due to coding errors at the county level. However, in a few cases, DOR-reported distributions made from the mixed drink tax (liquor by the drink) were less than the audited amount because revenues forthcoming from municipalities for education were coded as state revenues. In these cases, the audited amounts are used rather than the DOR-reported distributions.

Part I. Analysis of Overall Allocation of Total Statewide Shared Bank Excise Tax, Hall Income Tax, TVA Payments, and Alcohol-Related Revenues

General Fund Allocation of Shared Bank Excise Tax, Hall Income Tax, TVA Payments, and Alcohol-Related Revenues

The greatest portion of total statewide shared revenues was allocated to the general fund. Table E- 2 shows how important the collective shared revenues analyzed were to county general funds in FY 98. Counties statewide allocated \$40 million of the nearly \$70 million in bank excise tax, Hall income tax, TVA payments, and alcohol-related taxes to their general funds, or about 58 percent of total shared revenues to counties went to the counties' general funds.

*Table E- 2. State-shared Revenues Allocated to County General Funds for FY 98**

Statewide Total Shared Revenues to County General Funds	\$39,943,985
Total Statewide Shared Revenues*	\$68,649,581
Percent to Statewide County General Funds*	58%
Maximum County Allocation Amount of Shared Revenues to General Fund – <i>Shelby County (percentage = 93%)</i>	\$7,077,208
Maximum County Allocation as a Percentage of Shared Funds to General Fund – <i>(6 counties: Campbell = \$837,397; Cumberland = \$766,576; Hardeman = \$549,949; Humphreys = \$783,911; Pickett = \$131,904; Sumner = \$1,039,561)</i>	100%
Minimum County Allocation Amount of Shared Revenues to General Fund – <i>Houston County (percentage = 3.6%)</i>	\$7,647
Mean County Allocation Percentage of Shared Revenues to General Fund	55%
Standard Deviation of Mean Allocation Percentage of Shared Revenues to General Fund	28%

Source: FY 98 county audit reports and county finance officials

**Includes Excise and Hall income tax, TVA payments, and alcohol-related taxes; does not include any Davidson County funds*

Table E- 2 above shows the allocations of the shared revenues to counties' general funds, along with the county that allocated the most money to the general fund. Shelby County allocated over \$7 million (93 percent) of shared revenues to the general fund, more than any other county amount (the larger counties typically have larger amounts because they receive greater shared revenues). Five counties allocated 100 percent of their shared revenues to their general funds including Campbell, Cumberland, Hardeman, Humphreys, Pickett, and Sumner.

The amounts for all the counties allocating shared revenues to their general funds varied greatly. Although the mean (average) allocation was 55 percent of total shared revenues to each county's general fund, the standard deviation was nearly 28 percent. This means that on average each percentage allocation of shared taxes varied from the average allocation by 28 percent, over half of the mean allocation. *An important implication of this measurement is that county governments do not simply direct the non-motor-fuel-related shared taxes to their general funds.* As shown further in this analysis, shared revenues are used not only for funding public safety, public health, and other such critical and essential services which are a large proportion of expenditures funded directly out of county general funds. Shared revenues are also directed to

other equally essential services such as schools and solid waste, along with debt service, an obligation that is largely related to school construction.

General Purpose School Fund Allocation of Shared Bank Excise Tax, Hall Income Tax, TVA Payments, and Alcohol-Related Revenues

The second greatest amount of shared revenues went to the general purpose school fund. Table E- 3 presents the portion of shared revenues that are allocated to the general-purpose school fund.

*Table E- 3. State-shared Revenues Allocated to County General Purpose School Funds for FY 98**

Statewide Total Shared Revenues to County General Purpose School Funds	\$20,815,075
Total Statewide Shared Revenues*	\$68,649,581
Percent to Statewide County General Purpose School Funds*	30%
Maximum County Allocation Amount of Shared Revenues to General Purpose School Fund – <i>Stewart County (percentage = 92.5%)</i>	\$1,148,861
Maximum County Allocation as a Percentage of Shared Funds to General Purpose School Fund – <i>Jefferson County (amount = \$615,408)</i>	92.9%
Minimum County Allocation as a Percentage of Shared Funds to General Purpose School Fund – <i>(counties allocating no shared revenues to general fund: Campbell, Cumberland, Gibson, Hardeman, Humphreys, Maury, Pickett, Sumner, Tipton)</i>	\$0
Mean County Allocation Percentage of Shared Revenues to General Purpose School Fund	34%
Standard Deviation of Mean Allocation Percentage of Shared Revenues to General Purpose School Fund	27%

Source: FY 98 county audit reports and county finance officials

**Includes Excise and Hall income tax, TVA payments, and alcohol-related taxes; does not include any Davidson County funds*

Statewide, counties allocated nearly \$21 million of their nearly \$69 million shared revenues to their general purpose school funds, or about 30 percent. The county that allocated the most funds to the general purpose school fund was Stewart at over \$1.1 million, an amount that was 92.5 percent of their total shared revenues. Jefferson County allocated the highest percentage at nearly 93 percent of shared revenues to the general purpose school fund. The Jefferson County allocation represented \$615,408 in shared revenues. On average, each county allocated 34 percent to the general purpose school fund from shared revenues; however, this varied greatly from county to county as the standard deviation (average difference from the mean) was 27 percent, further illustrating the degree to which counties depend on shared revenues to support education. A total of 87 counties allocated some portion of shared revenues to the general purpose school fund.

General Debt Service Fund Allocation of Shared Bank Excise Tax, Hall Income Tax, TVA Payments, and Alcohol-Related Revenues

The third greatest portion of total shared revenues was allocated to debt service. Table E- 4 presents the portion of shared revenues that are allocated to the general debt service fund.

*Table E- 4. State-shared Revenues Allocated to County General Debt Service Funds for FY 98**

Statewide Total Shared Revenues to County Debt Service Funds	\$5,003,682
Total Statewide Shared Revenues*	\$68,649,581
Percent to Statewide County Debt Service Funds*	7.3%
Maximum County Allocation <i>Amount</i> of Shared Revenues to Debt Service Fund – <i>Hamilton County (percentage = 53.4%)</i>	\$1,911,361
Maximum County Allocation as a <i>Percentage</i> of Shared Revenues to Debt Service Fund – <i>Overton County (amount = \$231,169)</i>	73.2%
Total Number of Counties Allocating Shared Revenues to Debt Service Fund	58
Mean County Allocation Percentage of Shared Revenues to Debt Service Fund (includes 58 counties with an allocation)	10%
Standard Deviation of Mean Allocation Percentage of Shared Revenues to Debt Service Fund	15%

Source: FY 98 county audit reports and county finance officials

**Includes Excise and Hall income tax, TVA payments, and alcohol-related taxes; does not include any Davidson County funds.*

As Table E- 4 indicates, counties used \$5 million of their nearly \$69 million in shared revenues to help support debt service, an amount that is over 7 percent of non-motor-fuel-related shared revenues. Hamilton County allocated the greatest amount at \$1.9 million of shared revenues, over 53 percent of their total shared revenues. Overton County allocated the greatest percentage, over 73 percent, of their shared revenues to debt service. A total of 58 counties used an average of 10 percent of their shared revenues to fund debt service. However, each county’s percentage varied greatly as indicated by the high standard deviation of the average at 15 percent.

Allocation of Shared Bank Excise Tax, Hall Income Tax, TVA Payments, and Alcohol-Related Revenues to Other Funds

County highway funds and solid waste funds received the fourth and fifth greatest portions of shared revenues, respectively. Table E-s 5 and 6 below provide an overview of the allocation of shared revenues to these funds.

*Table E- 5. State-shared Revenues Allocated to County Highway Funds for FY 98**

Statewide Total Shared Revenues to Highway Funds	\$1,385,718
Total Statewide Shared Revenues*	\$68,649,581
Percent to Statewide County Highway Funds*	2%
Total Number of Counties Allocating Shared Revenues to Highway Fund	48
Number of Counties Allocating More Than 5% in Shared Revenues to Highway Fund	10

Source: FY 98 county audit reports and county finance officials

**Includes Excise and Hall income tax, TVA payments, and alcohol-related taxes; does not include any Davidson County funds.*

Forty-eight counties collectively allocated only 2 percent of shared revenues to highway funds. In a very few cases, the amounts were significant percentages of shared revenues. Williamson County allocated 45 percent of its shared revenues to the highway fund, followed by Lewis County with 15 percent and Lauderdale County with 10 percent. However, for the remaining 45 counties, the percentages were significantly less.

*Table E- 6. State-shared Revenues Allocated to County Solid Waste Funds for FY 98**

Statewide Total Shared Revenues to Solid Waste Funds	\$997,947
Total Statewide Shared Revenues*	\$68,649,581
Percent to Statewide County Solid Waste Funds*	1.5%
Total Number of Counties Allocating Shared Revenues to Solid Waste Fund	34
Number of Counties Allocating More Than 5% in Shared Revenues to Solid Waste Fund	12

Source: FY 98 county audit reports and county finance officials

**Includes Excise and Hall income tax, TVA payments, and alcohol-related taxes; does not include any Davidson County funds.*

Thirty-four counties allocated 1.5 percent of shared revenues to solid waste. Of these, 12 allocated more than 5 percent of total shared revenues. Among these 12, the average was nearly 13 percent of total shared revenues allocated to solid waste funds. Furthermore, seven counties allocated more than 10 percent of shared revenues to solid waste. Warren County allocated the greatest portion of its shared revenues at 31 percent.

Part II. Analysis of Allocation of Shared Revenues by Type of Revenue

Bank Excise Tax

Table E- 7 below provides a summary of the allocation of the bank excise tax among various funds.

Table E- 7. Allocation of the Bank Excise Tax

Statewide Total Bank Excise Tax Revenue*	\$12,680,706
Statewide Bank Excise Tax Allocated to General Fund	\$8,363,127
Statewide Percent Allocated to General Fund	66%
Total Number of Counties Allocating Bank Excise Tax to General Fund	89
Statewide Bank Excise Tax Allocated to General Purpose School Fund	\$2,501,282
Statewide Percent Allocated to General Purpose School Fund	20%
Total Number of Counties Allocating Bank Excise Tax to General Purpose School Fund	56
Statewide Bank Excise Tax Allocated to Debt Service Fund	\$1,053,141
Statewide Percent Allocated to Debt Service Fund	8%
Total Number of Counties Allocating Bank Excise Tax to Debt Service Fund	52
Statewide Bank Excise Tax Allocated to Highway Fund	\$493,905
Statewide Percent Allocated to Highway Fund	4%
Total Number of Counties Allocating Bank Excise Tax to Highway Fund	41

*Source: FY 98 county audit reports and county finance officials
*based on audit total rather than actual distribution;
does not include any Davidson County funds.*

As indicated in Table E- 7, although most counties put most of their bank excise tax revenues in the general fund, over half of counties allocated 20 percent of revenues to the general purpose school fund, 8 percent to debt service, and 4 percent to the highway fund.

Hall Income Tax

Table E- 8 below provides a summary of the allocation of the Hall income tax among various funds.

Table E- 8. Allocation of the Hall Income Tax

Statewide Total Hall Income Tax Revenue*	\$8,563,502
Statewide Hall Income Tax Allocated to General Fund	\$7,480,839
Statewide Percent Allocated to General Fund	87%
Total Number of Counties Allocating Hall Income Tax to General Fund	85
Statewide Hall Income Tax Allocated to General Purpose School Fund	\$371,732
Statewide Percent Allocated to General Purpose School Fund	3%
Total Number of Counties Allocating Hall Income Tax to General Purpose School Fund	12
Average Allocation of Hall Income Tax to General Purpose School Fund (by 12 counties)	68%

Source: FY 98 county audit reports and county finance officials

**based on audit total rather than actual distribution;*

does not include any Davidson County funds.

As indicated in Table E- 8, counties allocated most of their Hall income tax revenues to the general fund. However, 4 of 12 counties that allocated the Hall income tax to the general purpose school fund allocated the entire amount, or 100 percent. The average among the 12 counties allocating the Hall income to the general purpose school fund was nearly 68 percent of funds.

TVA Payments

Table E- 9 below provides a summary of the allocation of the Hall income tax among various funds.

Table E- 9. Allocation of TVA Payments

Statewide Total TVA Payments*	\$39,801,901
Statewide TVA Payments Allocated to General Fund	\$18,522,681
Statewide Percent Allocated to General Fund	47%
Total Number of Counties Allocating TVA Payments to General Fund	68
Statewide TVA Payments Allocated to General Purpose School Fund	\$15,982,166
Statewide Percent Allocated to General Purpose School Fund	40%
Total Number of Counties Allocating TVA Payments to General Purpose School Fund	61
Average Allocation of TVA Payments to General Purpose School Fund	65%

Table E- 9. Allocation of TVA Payments (continued)

Statewide TVA Payments Allocated to Debt Service Fund	\$3,883,183
Statewide Percent Allocated to Debt Service Fund	10%
Total Number of Counties Allocating TVA Payments to Debt Service Fund	28
Average Allocation of Hall Income Tax to General Purpose School Fund	23%

Source: FY 98 county audit reports and county finance officials

**based on audit total rather than actual distribution; does not include any Davidson County funds. Table E- 9. Allocation of TVA Payments (continued)*based on audit total rather than actual distribution; does not include any Davidson County funds.*

As indicated in Table E- 9, counties allocated 47 percent of TVA revenues to the general fund and 40 percent to the general purpose school fund. Of the 61 counties allocating TVA payments to the general purpose school fund, 17 counties allocated 100 percent. The overall average allocation to the general purpose school fund was 65 percent of TVA revenues. Most of the remainder of the statewide TVA payments were allocated to debt service at 10 percent. The average allocation of TVA payments to debt service among the 28 counties who used TVA revenues for that purpose, was 23 percent.

Beer, Alcoholic Beverage and Mixed Drink Tax

Table E- 10 below provides a summary of the allocation of the Hall income tax among various funds.

Table E- 10. Allocation of Alcohol-Related Taxes

Statewide Total Alcohol-Related Taxes*	\$7,634,055
Statewide Alcohol-Related Taxes Allocated to General Fund	\$5,577,338
Statewide Percent Allocated to General Fund	73%
Total Number of Counties Allocating Alcohol-Related Taxes to General Fund	93
Statewide Alcohol-Related Taxes Allocated to General Purpose School Fund	\$1,959,895
Statewide Percent Allocated to General Purpose School Fund	26%
Total Number of Counties Allocating Alcohol-Related Taxes to General Purpose School Fund	36

Source: FY 98 county audit reports and county finance officials

**based on audit total rather than actual distribution; does not include any Davidson County funds.*

As indicated in Table E- 10, nearly three-quarters of statewide total alcohol-related shared revenues are allocated to county general funds in 93 counties, with the remainder being allocated to the general purpose school fund by 36 counties.

Implications of Loss of State-shared Revenues to County Budgets

A good indication of how the loss of state-shared revenues in this analysis might be measured would be to compare the total shared revenues with fund balances in the county general fund and the general purpose school fund. This is appropriate for three reasons: (1) the apparent significance of these shared revenues to the general fund and the general purpose school fund as indicated by this analysis; (2) the relative importance of the general fund and general purpose school fund to county budgets; and, (3) the discretionary nature of the shared revenues that have been analyzed.

Table E- 11 below provides a summary of the comparison of shared revenues to the general fund and general purpose school fund balances at the end of FY 98.

*Table E- 11. Impact of Loss of Shared Revenues to General and General Purpose School Funds**

Number of counties with shared revenues that are 50% or greater of general fund balances	33
Average importance of shared revenues to general fund balances (percentage shared revenues are of general fund balance)	51%
Number of counties with shared revenues that are 50% or greater of general purpose school fund balances	15
Average importance of shared revenues to general purpose school fund balances (percentage shared revenues are of general fund balance)	35%
Number of counties that would have a general fund deficit without shared revenues	10
Number of counties that would have a general purpose school fund deficit without shared revenues	6

Source: FY 98 county audit reports and county finance officials; does not include Davidson County

Clearly, the analysis shows that counties would be greatly affected by the loss of these shared revenues. Needless to say, compensating for the loss would generally impact the counties with the least resources, and the impact would be immediate. With an average general fund dependence of over 50 percent, most county general funds would be immediately affected, with the remaining few most likely having deficits in the second year. General purpose school funds exhibit a slightly lower dependence by counties on shared revenues, an average of 35 percent, possibly implying some might be able to operate only one year without a deficit in the school fund.

APPENDIX F: State-Shared Taxes as a % of Local Budgets, Select County and Municipal Governments, FY 99

Appendix F reports state-shared taxes as a percent of local budgets for the four most populous counties and for one smaller county from each Grand Division. Comparable data is reported for each municipality within these counties. This selection provides a useful sample for comparisons across Tennessee.

Local Government	FY 1999 Budget	1999 State Shared Revenue											Total as % of Total Local Budget

² Municipality located in multiple counties. Amounts shown here are total budget and distributions amounts.

Appendix G. Fiscal Impact on Municipalities of Loss of All State Shared Taxes.

Table methodology. This appendix used the latest available property assessment and state-shared tax data to calculate the property tax rate that would be required to replace state shared tax revenues (if existing shared tax distribution statutes were repealed and the monies were reclaimed by the state). It is not possible to calculate “property tax equivalents” for municipalities that do not currently impose a property tax, as assessment data is not maintained for such municipalities. In Appendix G, the “property tax equivalent” is shown for each municipality. The rate is expressed in standard terms, that is, rate per \$100 of assessed valuation. Since “Total 1998 Assessment” data refers to assessed value rather than appraised value, there is no need to account for assessment ratio differences across property categories (eg. residential at 25%, commercial at 40%, etc.). Also shown is the percentage increase in property tax rates. The percentage increase is calculated by adding the 1998 rate with the property tax equivalent rate, then expressing the combined rate as a percentage increase over the 1998 rate.

Since the property tax equivalent rate is not an intuitive measure of the dollar increase in a property owner’s tax liability, two additional columns are included in Appendix G to give some perspective on the property tax equivalent rate. The first is a calculation of the additional property tax liability on a home valued at \$100,000.¹⁵ The second is a calculation of the additional property tax liability on a commercial property valued at \$1,000,000.¹⁶

¹⁵ Because of the 25% residential assessment ratio established by the Tennessee Constitution (Section XX), the calculations are based on the rate per \$100 of an assessed value of \$25,000.

¹⁶ Because of the 40% commercial assessment ratio established by the Tennessee Constitution (Section XX), the calculations are based on the rate per \$100 of an assessed value of \$400,000.

**Appendix G. Additional Property Tax Rate Required to Offset Potential Loss of All State-Shared Taxes
for Tennessee Municipalities**

Legend:

N/A - Municipality does not presently collect property tax and therefore assessments are not presently known

** - Municipality lies in more than one county; the rate displayed is from the predominant portion if different*

Appendix H. Fiscal Impact on Counties of Loss of State Shared Taxes.

Table methodology. This appendix used the latest available property assessment and state-shared tax data to calculate the property tax rate that would be required to replace state shared tax revenues (if existing shared tax distribution statutes were repealed and the monies were reclaimed by the state). In Appendix H, the “property tax equivalent” is shown for each county. The rate is expressed in standard terms, that is, rate per \$100 of assessed valuation. Since “Total 1998 Assessment” data refers to assessed value rather than appraised value, there is no need to account for assessment ratio differences across property categories (eg. residential at 25%, commercial at 40%, etc.). Also shown is the percentage increase in property tax rates. The percentage increase is calculated by adding the 1998 rate with the property tax equivalent rate, then expressing the combined rate as a percentage increase over the 1998 rate.

Since the property tax equivalent rate is not an intuitive measure of the dollar increase in a property owner’s tax liability, two additional columns are included in Appendix H to give some perspective on the property tax equivalent rate. The first is a calculation of the additional property tax liability on a home valued at \$100,000.¹⁷ The second is a calculation of the additional property tax liability on a commercial property valued at \$1,000,000.

¹⁷ Because of the 25% residential assessment ratio established by the Tennessee Constitution (Section XX), the calculations are based on the rate per \$100 of an assessed value of \$25,000.

Note: Due to security concerns related to the low volume of filers, this table does not include distributions for coal or gas severance taxes.

APPENDIX I. The Tennessee Gasoline Tax, A Mini-Case Study¹⁸

Gasoline Tax Distribution Formula: A Comparative Analysis¹⁹

In a recent report, Chervin (1998, p. 10) estimates that \$206.4 million dollars of the gasoline tax revenues are distributed to counties and cities in Tennessee. Under the current formula for both the gasoline and motor fuel tax, one-fourth of the county share is based on population, one-fourth on county area, and one-half of the revenue is shared equally. City shares of the gasoline tax are based on population. The following provides, for comparison, information on the distribution of gasoline or motor fuel taxes in the border states of Arkansas, Georgia and Missouri.

The state of Arkansas shares its gasoline tax revenues, 15 percent going to both its County Aid Fund and Municipal Aid Fund. (Arkansas Code/Title 27. Transportation./Subtitle 5. Highways, Roads, And Streets./Chapter 70. Highway Revenue Distribution./Subchapter 2. Arkansas Highway Revenue Distribution Law./ § 27-70-206. Distribution to state funds.)

The state of Georgia reports that there is no distribution of state-collected gasoline tax revenues to county or municipal governments. All funds are expended by the state Department of Transportation. Instead of a shared tax, Georgia has a local option gasoline tax.

In Missouri, statewide collections of motor fuel tax apportioned among counties, cities, and the state are distributed thus: 10 percent to counties, 15 percent to cities, and 75 percent to the state. An additional five-percent of any increased tax rate is distributed to the County Road Trust Fund and five percent to the city of St. Louis.

Analysis of the Distribution of Gasoline Tax Revenues in Tennessee

Quindry and Engels (1972, pp. 12-32) suggest a number of criteria for the distribution of Tennessee tax revenues among state, county, and cities, including population, land area, origin of revenues, the number of registered motor vehicles, and volume of gasoline sales. Other broad distribution formulas may include annual legislative appropriations, tax yield, and a need-based formula. The Quindry-Engels analysis included least squares regression models that related the share of gasoline tax received by each county with population density, the county's population growth rate, highway mileage in the county, and the number of automobiles registered in the county, among other variables.

¹⁸ The information in this appendix is drawn from *Sharing Taxes between State and Local Governments in Tennessee*, a report prepared for the TACIR by Dr. Reuben Kyle, et al., of the Business and Economic Research Center, Middle Tennessee State University.

¹⁹ All of Tennessee's eight neighbor states were surveyed regarding their distribution of shared tax revenues.

Quindry and Engels show that other things equal, the Tennessee counties with the highest population density and the highest population growth rates receive relatively less gasoline tax revenue than other counties. Table I-1, below, provides the total gasoline and motor fuel distribution by county for 1995 plus the county's population, area, road mileage, vehicles registered, and the county's relative share of each of those variables. These data are consistent with the regression results for the Quindry-Engels model. The results indicate that, other things equal, the most densely populated counties and the fastest growing counties in the state receive smaller relative shares of Tennessee's gasoline and motor fuel shared tax revenues than other counties.

Sources: TN Department of Revenue, TN Department of Transportation, US Census Bureau

At issue is an equitable method for distributing the gasoline and motor fuel tax revenues that are collected from users of public streets, roads, and highways where the revenues are designated for use in the maintenance of that same road network. The current formula assigns one-quarter of the weight to land area and one-half of the weighting is simply divided equally among the 95 counties. As a result, counties with large land area but low population density are rewarded with relatively large shares of fuel taxes.

One alternative basis for addressing the question is to allocate the revenues to those with the highest use of those roads and, consequently, those making the highest contribution to the pool of tax revenues. In an attempt to measure the influence of the extent of road usage, this study constructed a variable as follows: (county population minus commuters leaving the county plus commuters entering the county) divided by road mileage within the county. The Quindry-Engels model was then estimated including the new variable. Once again, the results indicate that, other things equal, Tennessee counties with the highest usage of roads receive relatively lower shares of fuel tax revenues.

Table I-2 compares the distribution of gasoline and motor fuel tax revenues for 1995 actually received with a distribution based on the road utilization. The result would be a substantial reallocation of Tennessee's fuel tax distribution. Rather surprisingly there is no consistent pattern to the redistribution. The largest counties in the state are not the biggest beneficiaries. In fact, Shelby County would lose about five percent of its 1996 fuel tax receipts. The largest gain would be by rural Union County. The road utilization variable is only one of many possible bases for distribution of fuel tax revenues. Road utilization may also be a good estimate of the actual fuel tax generated by county. Fuel taxes are paid by wholesalers and not on the basis of the county where the tax was generated. Thus, data is not available on the source of fuel taxes. But a reasonable way to distribute fuel taxes to be used to maintain roads and highways is on the basis of the origin of those tax revenues. Clearly, those communities that generate the most fuel taxes are likely to be the counties with the highest need for the tax revenues. Simply, the State would collect the taxes and return the revenues to the counties where they were collected to the benefit of the taxpayers who reside in those counties.

**TABLE I-2. GASOLINE AND MOTOR FUEL TAX FUND DISTRIBUTION JUSTIFICATION

Conclusions

The state of Tennessee's system of distributing gasoline and motor fuel tax revenues differs from that of many of its neighbors. Rather than permitting local option taxes, Tennessee collects gasoline and motor fuel taxes at the state level and distributes them through rather complex formulas. The results of the distribution are that Tennessee local governments with the highest road and highway utilization which also generate the most tax revenues may not receive commensurate shares of those revenues. It is likely that those same counties subsidize the citizens of other counties in another respect as well. The counties with the highest level of road utilization are also the counties with the largest number of commuters entering the county. Thus, those counties receive relatively smaller shares of the tax revenues and, at the same time, incur higher costs of road maintenance imposed by citizens of other counties that commute to work in the high-use counties.

In the interest of equity, Tennessee should review its method for sharing fuel tax revenues between State and local governments. One alternative would be to reduce the state collected tax to the level of the State's share of those revenues and permit Tennessee counties to impose their own local option tax. Another alternative is to revise the formula for sharing the current fuel tax revenues.
