505 DEADERICK STREET
NASHVILLE, TENNESSEE 37243-1402
(615) 741-3821**

JOHN C. SCHROER
COMMISSIONER

BILL HASLAM
GOVERNOR

Amendment Information and Tips

During the first twenty-four (24) hours after issuance, the following fields are amendable:

- Width
- Height
- Length
- Gross Weight
- Number of Axles
- Axle Spacing's
- Axle Weights
- Vehicle/Equipment Information
- Start Date
- Origin & Route or Destination & Route
 - All three (3) fields cannot be amended at one time

After the initial twenty-four (24) hours, changes to vehicle information due to unforeseen circumstances such as weather and equipment availability can be made. However, the replacement equipment must maintain the same axle spacing, number of axles, and gross weight.

Changes to the following information would NOT require staff review within the first 24 hours:

- Start Date
- Vehicle/Equipment Information
- Request a date extension of 3 days

Changes to the following WOULD require staff review, and will follow the standard permit workflow:

- Width
- Height
- Length
- Gross Weight
- Number of Axles
- Axle Spacing's
- Axle Weights
- Origin
- Destination
- Route

Best Practice for Accuracy: Double Check

Once a permit has been created, but before final submission, please review the following information thoroughly:

- Company Name
- Origin (if located in Tennessee, must have complete street address)
- Destination (if located in Tennessee, must have complete street address)
- Route (must include all secondary roads)
