

Text-to-911

» PROJECT OVERVIEW

The Tennessee Emergency Communications Board (TECB) is actively working to initiate Text-to-911 service across the state. Text-to-911 service is an important step in advancing the emergency services available to the citizens of Tennessee, especially the deaf and hard of hearing community.

Text-to-911 will provide an alternative method of reaching 911 for all citizens when speech is not possible or making a voice call to 911 might be unsafe.

» WHO IS IMPACTED

All Emergency Communications Districts (ECDs) and Public Safety Answering Points (PSAPs) that are not already live with integrated Text-to-911 service will be impacted by this project.

» CURRENT STATUS – FEBRUARY UPDATES

Text-to-911 deployments are underway, with the goal of achieving statewide integrated text-to-911 service by June of 2023. TECB recently won the ARC, Agency of Distinction Award for this work and bringing equal access to those in need of emergency services.

Over the last quarter, two PSAPs have gone live and eight have requested service. This brings the total to 45 PSAPs that have gone live (covering over 4MM people, or 56% of the population), 53 PSAPs have requested service, and 38 PSAPs have not requested service. PSAPs fall into one of five categories:

- » **Live.** PSAP has successfully completed testing with the Text Control Center (TCC) provider and the wireless carriers, and the Text-to-911 service is functioning today.
- » **Text Ready.** PSAP has successfully completed testing with the TCC provider and the 911 network is ready. The PSAP must then work with the wireless carriers to enable the service.
- » **Scheduled.** PSAP has requested service from the TCC and has a date to establish 911 network readiness.
- » **Pending.** PSAP needs a software update or technical support to prepare the Call Handling Equipment (CHE) to take Text-to-911 requests and establish a date for text testing.
- » **Not Requested.** The PSAP has not requested Text-to-911 service from the service provider.

Text-to-911 Progress February 2022

STEPS TO DEPLOYMENT

1. Validate readiness with your CHE vendor
2. Initiate the deployment process with Eddie Burchell, the TECB Director of Technology
3. Complete the data collection sheet for AT&T
4. Attend project planning calls with Intrado (Technical)
5. Intrado completes provisioning (TCC, SBC, etc.)
6. Test PSAP to TCC connectivity and functionality (text ready)
7. Complete wireless carrier request for service
8. Conduct wireless carrier Text-to-911 functionality
9. Go live!

This process can take up to six months to complete end-to-end.

» NEXT STEPS

Unfortunately, there are still 61 PSAPs that are currently unable to move forward with Text-to-911 due to their Call Handling Equipment (CHE) not being capable of supporting the integrated solution. Many of these PSAPs currently use the over-the-top "ITS" solution today, but all PSAPs will be converted to the integrated solution as soon as they're ready. According to CHE providers, they should all be ready by Q2 2022. Mission Critical Partners (MCP) and the TECB will be tracking progress and reaching out to PSAPs and vendors as needed throughout 2022.
