

Microsoft Technology Associate

MTA Intro to Programming using Python

Aligned Program of Study: Coding

Description

Microsoft Technology Associate (MTA) is an introductory Microsoft certification for individuals considering a career in technology. MTA certification addresses a wide spectrum of fundamental technical concepts, assesses and validates your core technical knowledge, and enhances your technical credibility. Candidates for the MTA Intro to Programming using Python should be able to recognize and write syntactically correct Python code, recognize data types supported by Python, and be able to recognize and write Python code that will logically solve a given problem. This certification can only be taken after the MTA in Software Fundamentals has been obtained. MTA certifications allow students to explore career options in IT and validate their understanding of core concepts in IT infrastructure, databases, and software development. Each MTA certification can be earned in one semester and can be used to demonstrate your ability and commitment when applying for above entry-level IT positions.
