Sexual Violence -- Overview

What is sexual violence?

Sexual violence is sexual activity (physical contact or behavior) when consent is not obtained or not freely given. [1]

What are the consequences of sexual violence?

The consequences of sexual violence can be physical (e.g., bruising and genital injuries), and/or psychological (e.g., depression, anxiety, and suicidal thoughts). Victims can also experience long-term effects such as post-traumatic stress disorder or re-occurring reproductive, gastrointestinal, cardiovascular and sexual health problems. In addition, sexual violence is also linked to negative health behaviors such as smoking, alcohol abuse, drug use and engaging in risky sexual activity. [1]

Sexual Violence in the United States

Anyone can be a victim of sexual violence regardless of age, race, sex, sexual orientation or gender identity. [1,4]

- Every 68 seconds someone in the U.S. is sexually assaulted. [4]
- One out of every 6 women has been the victim of attempted or completed rape in her lifetime. [4]
- One out of every 33 men has been the victim of attempted or completed rape in his lifetime. [4]
- Almost 1 out of every 2 transgender persons report being sexually assaulted during their lifetime. [2]

Underreporting of Sexual Violence

- Only 310 out of every 1,000 sexual assaults are reported to the police. This means that 2 out of every 3 assaults go unreported. [3]
- Only 20% of female college students who are sexually assaulted report the sexual assault. [3]
- The most common reason for not reporting sexual assault is fear of retaliation. [3]

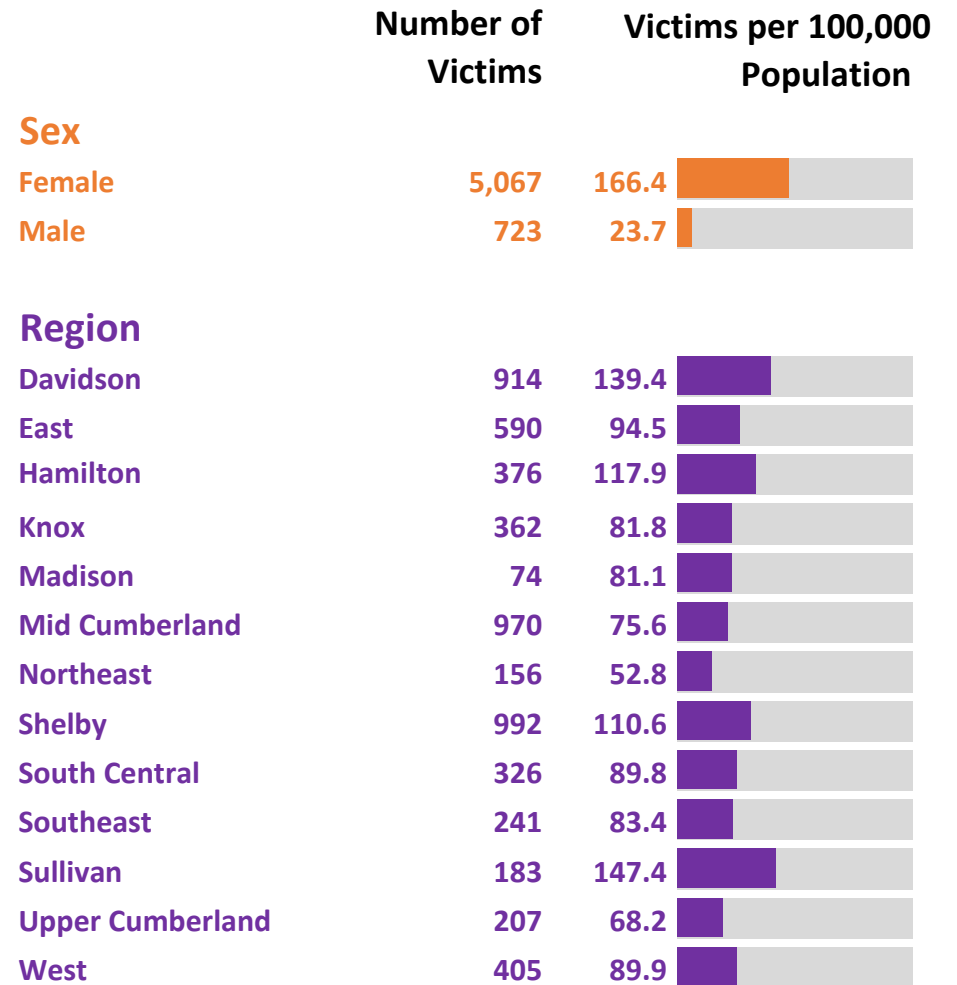

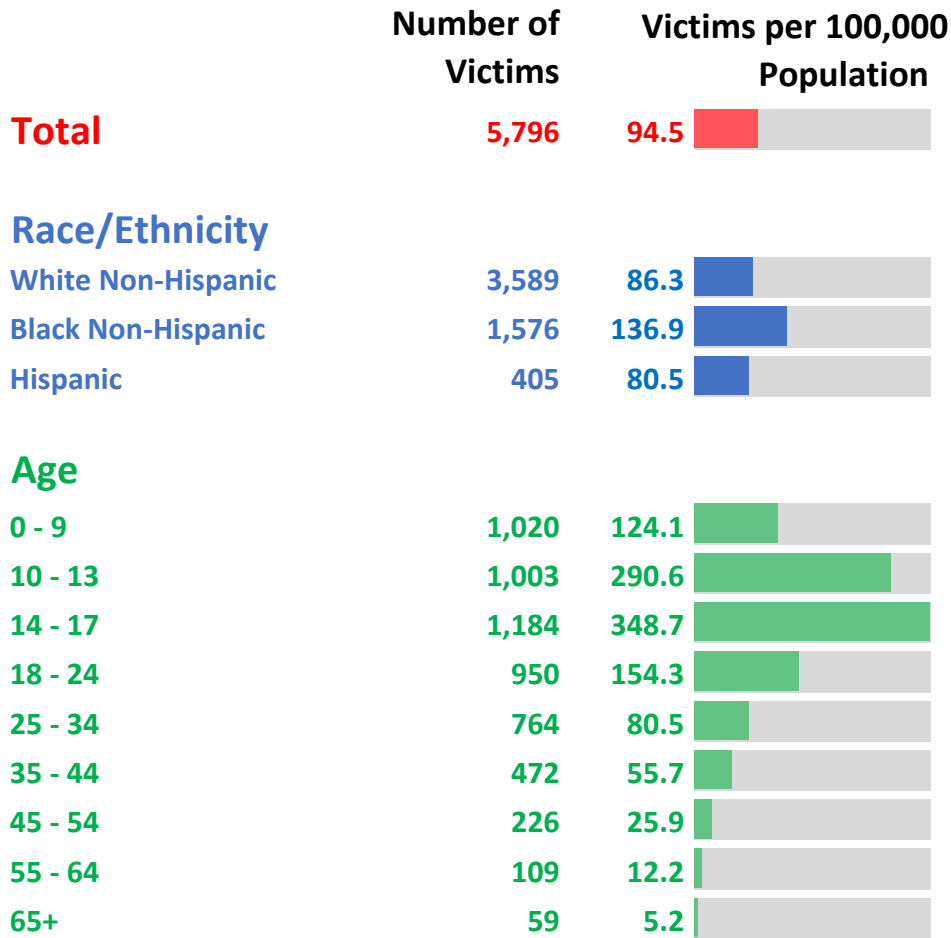

What is the Tennessee Department of Health doing to address sexual violence?

The Department's Rape Prevention and Education Program (RPE) works to prevent sexual violence through both community-based programs and those focused on individuals and relationships. Currently implemented programs include Safe Bar, Shifting Boundaries, Safe Dates, Coaching Boys into Men and Athletes as Leaders. Additional information about RPE can be found here:

[Rape Prevention and Education Program](#)

Sexual Assault Victims

The following charts summarize data on the victims of sexual assaults reported to Tennessee law enforcement agencies in 2019.

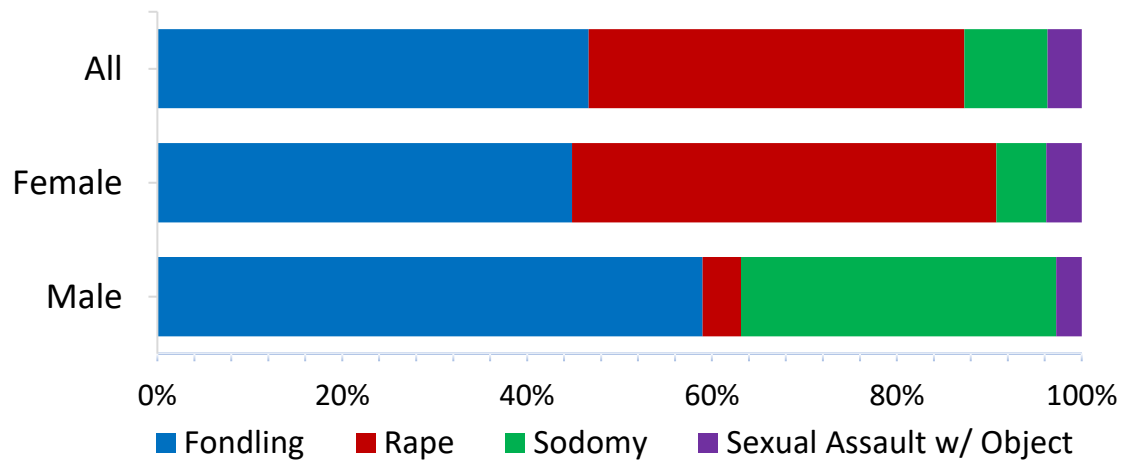

Sexual Assault Victims *cont.*

5-Year Trend in Sexual Assault Victims

- In 2019, there were 5,796 sexual assault victims reported to Tennessee law enforcement agencies. This represented about 95 victims for every 100,000 persons in the population.
- There was not a statistically significant change in the number or rate of sexual assault victims between 2015 and 2019.
- Fourteen to seventeen year olds had the highest rate of sexual assault victimization compared to other age groups.
- Women were more likely than men to be sexually assaulted.
- Black non-Hispanics were more likely than white non-Hispanics or Hispanics to be sexually assaulted.
- Forcible fondling and rape were the most common types of sexual assault among women, while forcible fondling and sodomy were most common among men.
- Among Health Department regions, the rate of sexual assault victimization ranged from 52.8 per 100,000 in Northeast to 147.4 in Sullivan.

Distribution of Sexual Assault Types by Sex

Sexual Assault Offenders

The following charts summarize data on the offenders of sexual assaults reported to Tennessee law enforcement agencies in 2019.

	Number of Offenders	Percent of Offenders
Total	6,207	100.0%
Age		
0 - 9	101	1.6%
10 - 13	453	7.3%
14 - 17	822	13.2%
18 - 24	857	13.8%
25 - 34	1,156	18.6%
35 - 44	907	14.6%
45 - 54	595	9.6%
55 - 64	347	5.6%
65+	181	2.9%
Sex		
Female	328	5.3%
Male	5,561	89.6%

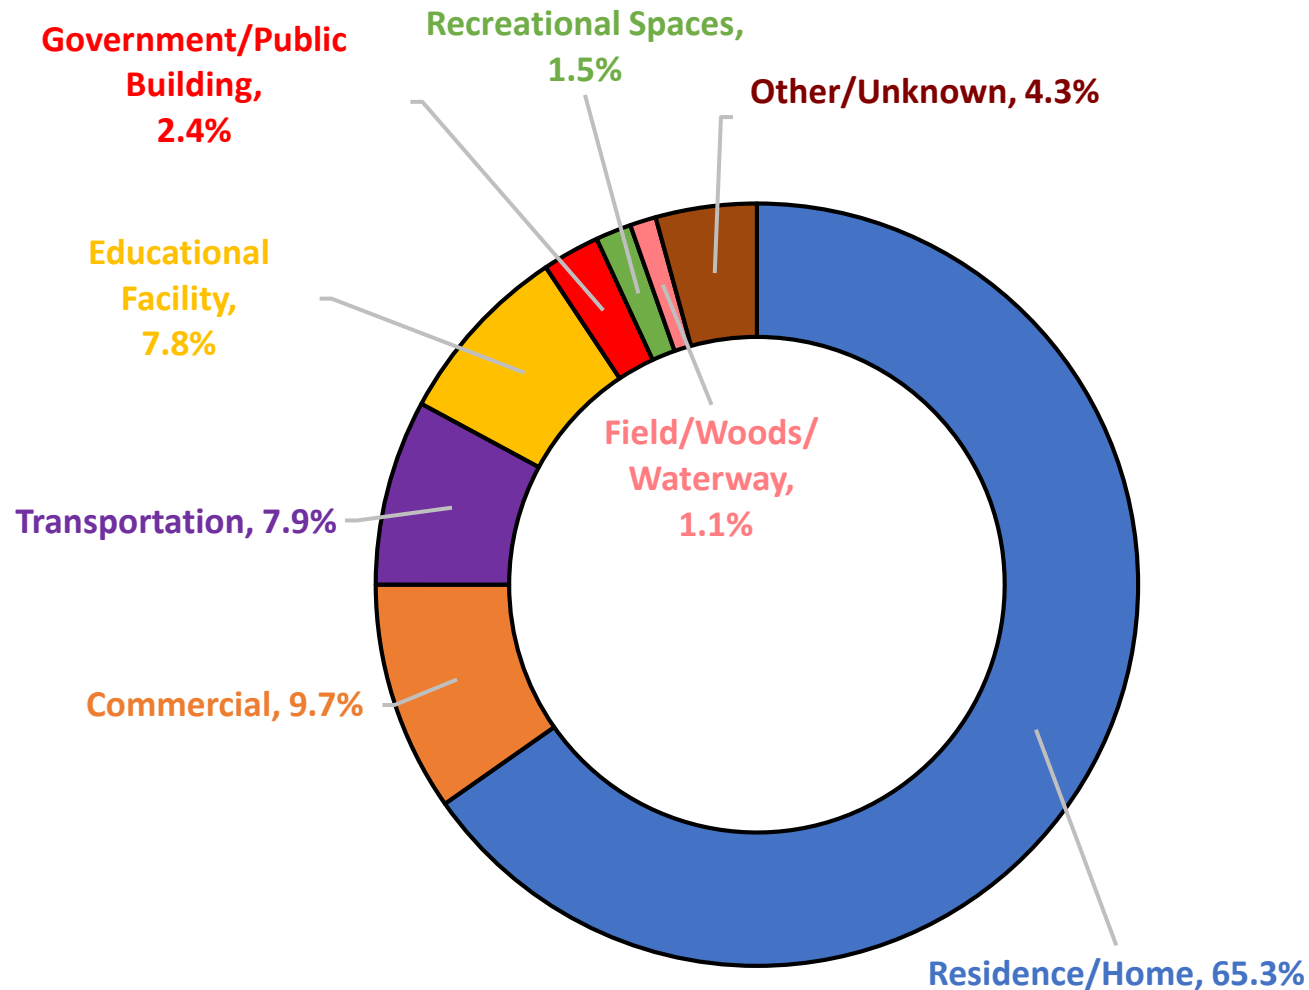

Relationship of Victim to Offender

- In 2019, there were 6,207 offenders of sexual assaults reported to Tennessee law enforcement agencies.
- Sexual assault offenders spanned a wide range of ages, with 25 to 34 year olds accounting for the highest percentage of offenders (19%).
- The majority of sexual assaults (90%) were committed by males.
- Seventy-five percent of sexual assaults were committed by someone known to the victim, with 22% committed by a family member.

Locations of Sexual Assaults

The following chart summarizes the locations where reported sexual assaults took place in 2019.

- The majority of sexual assaults (65%) occurred at or near a home or residence.
- Ten percent of assaults took place in commercial locations such as stores, restaurants and healthcare facilities.
- Eight percent of assaults took place in locations related to transportation, such as roads, parking lots and garages.
- Seven percent of assaults took place at educational facilities such as schools, universities and daycare facilities.

Technical Notes

Data Sources: 1) Tennessee Bureau of Investigation (TBI), Tennessee Incident Based Reporting System (TIBRS), and 2) Tennessee Department of Health, Division of Population Health Assessment, population estimates based on interpolated data from the U.S. Census's annual estimates of the resident population.

Tennessee crime statistics from TBI are available at [CrimeInsight](#).

The TIBRS Data Collection Manual can be accessed [here](#).

Numbers of victims are the total number of reported victims in 2019 or between 2015-2019, as specified in the report. The number of victims does not represent unique individuals. If an individual was involved in more than one incident within the reporting period, he or she is counted more than once. Victimization rates are for either 2019 or are the average, annual rates for 2015-2019. All rates are per 100,000 and are age-adjusted to the 2000 US Standard Population with 11 age groups. When making comparisons across groups (e.g., females vs. males or blacks vs. whites), it is recommended that 95% confidence intervals be considered (provided in the appendices). If the 95% CIs for two groups do not overlap, then the difference between them can be considered statistically significant. If they do overlap, then the difference may not be statistically significant. Comparisons made in the text of the report are all statistically significant unless otherwise specified.

The Tennessee Incident Based Reporting System (TIBRS) is used to collect crime statistics in Tennessee. Crimes are reported into the system by multiple law enforcement entities, including state, county, city and university/campus agencies. In TIBRS, a crime incident is defined as one or more offences committed by the same offender or group of offenders at the same time and place. There are three main categories of offences: crimes against persons, property or society.

Sex offences (i.e. sexual assaults) are considered crimes against persons and can be consensual or nonconsensual. This report focuses on nonconsensual sex offences which are defined as any sexual act directed against another person, without the consent of the victim, including instances where the victim is incapable of giving consent. Sex offences include rape, sodomy, sexual assault with an object and fondling.

- Rape – carnal knowledge (i.e. sexual intercourse between a man and a woman where there is at least some penetration).
- Sodomy - oral or anal sexual intercourse with another person.
- Sexual assault with an object - use of an object or instrument to unlawfully penetrate, however slightly, the genital or anal opening of the body of another person.
- Fondling - touching of the private body parts of another person for the purpose of sexual gratification.

Technical Notes *cont.*

The relationship between victims and offenders is reported in TIBRS as the relationship of the victim to the offender. For example, if the relationship reported is "child," then the victim was the child of the offender.

Examples of victim-offender relationships include:

Within Family	Outside of Family	Not Known by Victim	Other
Spouse	Acquaintance	Relationship unknown	Victim was offender
Common-law spouse	Friend	Victim was a stranger	
Parent	Neighbor		
Sibling	Baby/child in the care of babysitter		
Child	Boyfriend/girlfriend		

The category "victim was offender" is used in cases where all of the participants in the incident were victims and offenders of the same offense, such as a barroom brawls where "mutual combatants" are arrested.

TIBRS allows up to two locations to be reported for each offence -- primary and secondary. For example, if an offense occurs in a restaurant parking lot, the primary location would be reported as parking lot and the secondary location would be restaurant. Analyses for this report were restricted to primary locations.
