QIN-QIO Update

Jennifer Ride, Director

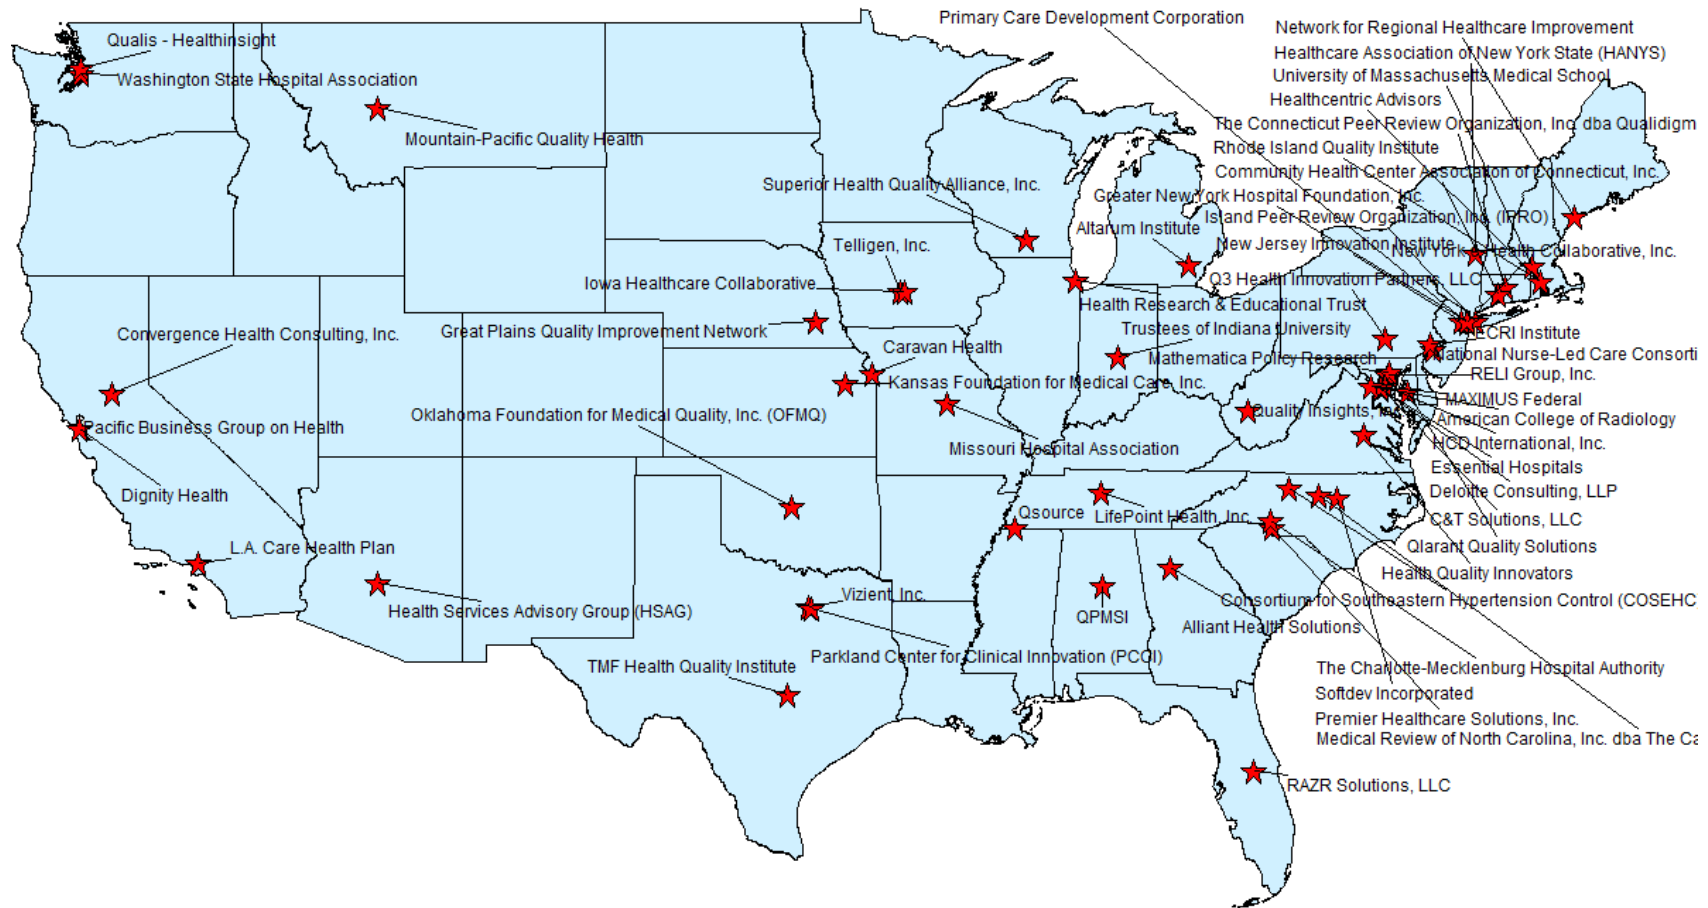

TN Quality Improvement

July 1, 2019

Qsource Mission:

To serve healthcare communities by driving value, improving quality and providing innovative business solutions.

59 NQIIC Contractors

NQIIC: Network of Quality Improvement and Innovation Contractors.

Pre-qualifier requirement for QIN-QIO, Physician Support, ESRD, Hospital Improvement Innovation Network (HIIN) Contracting Opportunities among others.

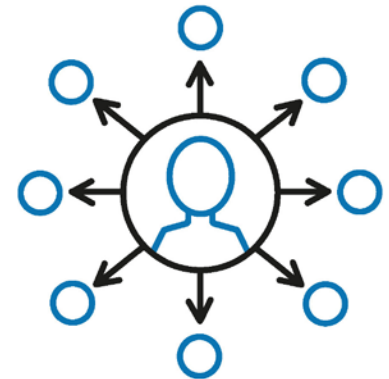

NQIIC Task Order #1: QIN-QIO 12th SoW

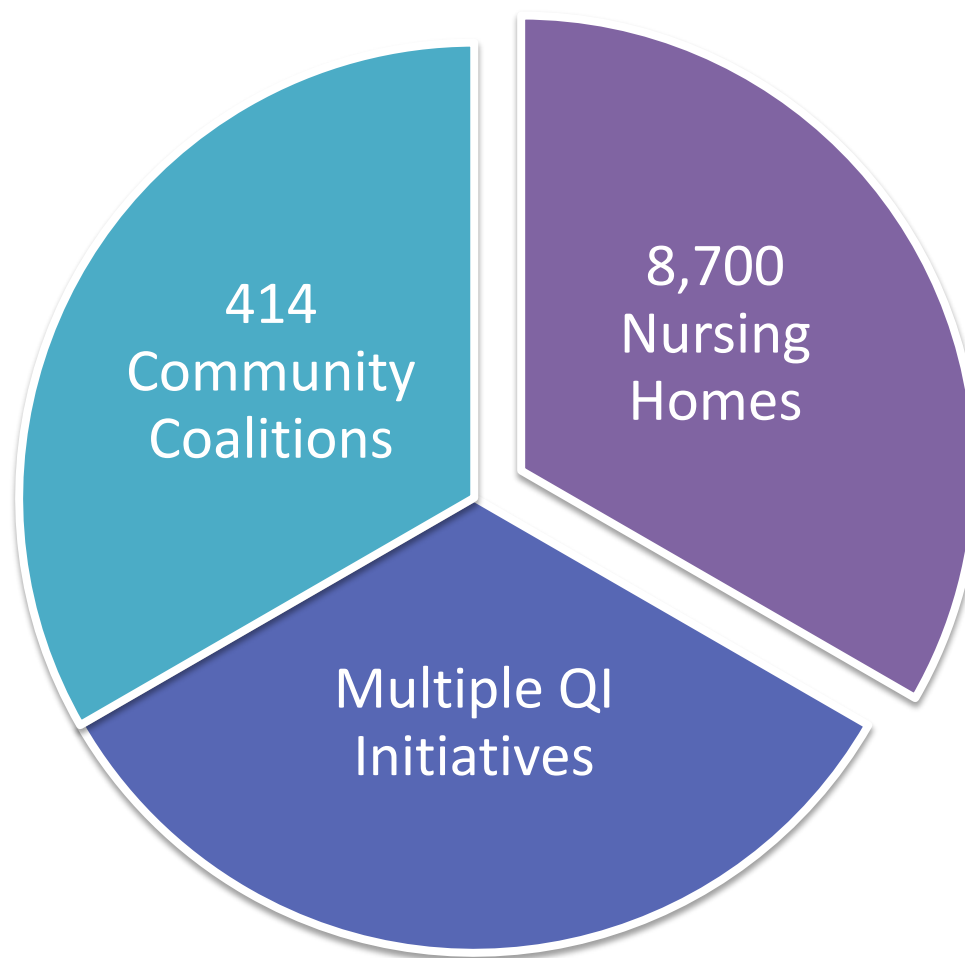

Task Order Focus Areas

The QIN-QIO quality improvement projects under the 12SOW Task Order focus on the following high priority Task Settings/Areas goals and priorities:

- ▶ Task Area 1: Long Term Care -Nursing Homes
- ▶ Task Area 2: Community Coalitions
- ▶ Task Area 3: Quality Improvement Initiatives

Contract Overview

Task Area 1: Long Term Care – Nursing Homes

Improve Behavioral Health Outcomes

- Decrease opioid related adverse events including deaths by 7%
- Using current best practices and patient-centered approaches, decrease opioid prescribing (for prescriptions ≥ 90 MME daily) across

Increase Patient Safety: Reduce all cause harm

- Reduce Averse Drub Events by 15.2%
- Reduce *c. difficile*.

Improve Nursing Home Quality

- Improve by 11% the total quality score for all nursing homes, reduce by 41% the percentage of NHs with a total quality score less than 890 (2 Star rating)
- Reduce healthcare-related infections in nursing homes (contribute to the development of national baselines for healthcare related infections in nursing homes).
- Reduce ED visits by 14.44% and readmissions by 9.12% in short stay nursing home residents by 2024.

Task Area 2: Community-Based Tasks

Improve Behavioral Health Outcomes

- Decrease Opioid misuse by 7%
- Implement pain and opioid use best practices in 20% of the U.S. Population (naloxone distribution, Medication-assisted Therapy, and locally adopted tools)

Increase Patient Safety

- Reduce high-risk medication ADEs in MCARE beneficiaries by 6.5%

Increase Chronic Disease Self-Management

- Cardiac and Vascular Health – 3 % reduction in smoking
- Diabetes - Referral to Diabetes Prevention Program (DPP)
- Chronic Kidney Disease - Improved screening, diagnosis treatment for CKD

Increase Quality of Care Transitions

- Reduce Admission by 4.1% and Readmission by 5.4%, with special focus on super utilizers in Medicare Advantage plans
- Monitor potentially avoidable ED visits

Task Area 3: Quality Improvement Initiatives

Opportunities for systemic quality improvement may arise within a health care system on a particular healthcare delivery or process area.

Opportunities may come from a variety of sources, including beneficiary complaints, healthcare facility identified needs, data trend analysis, quality surveyor or other federal stakeholders

QIN-QIOs will determine the need for QIIs and implement direct technical assistance for the specific initiative identified or referred.

Additional Focus Areas – HIT, Reporting and LANs

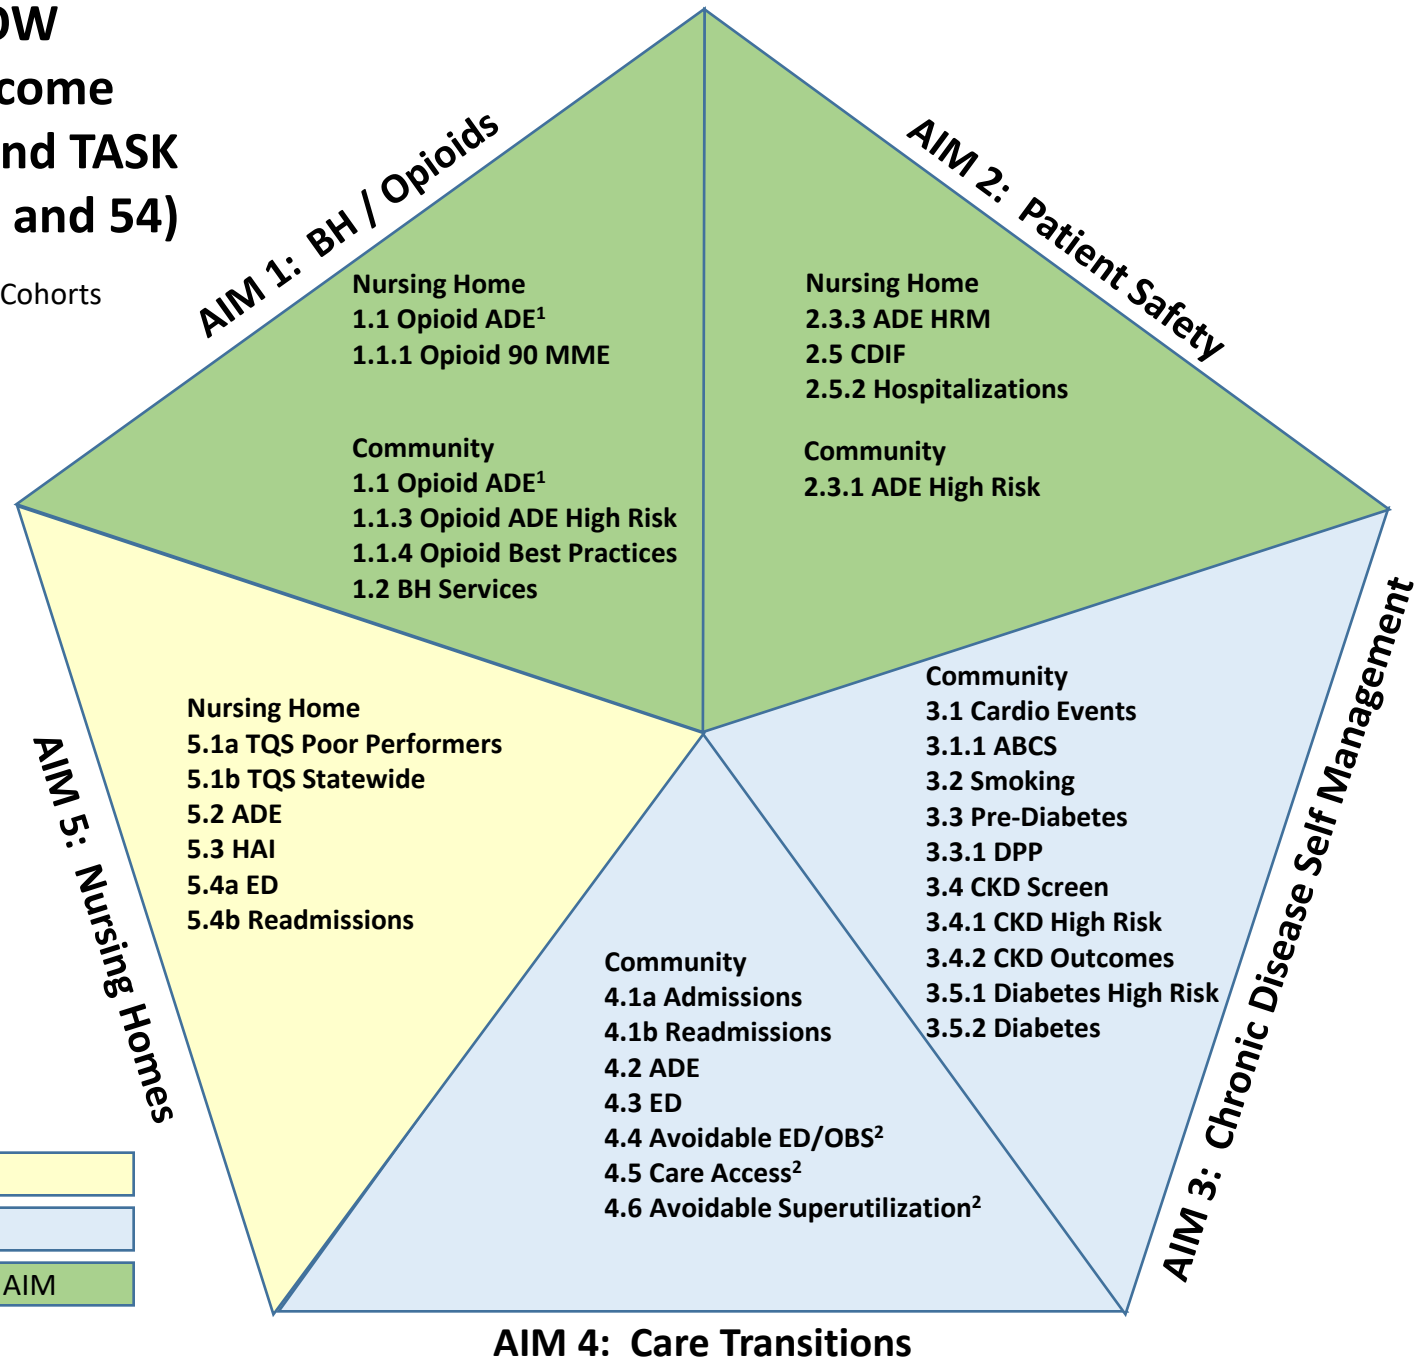

- ❖ Promote understanding and use of Prescription Drug Monitoring Program (PDMPs), EHRs and evidence-based clinical support tools
- ❖ Integrate real-time feedback to prescribers
- ❖ Develop innovative HIT solutions to reduce Opioid related harms
- ❖ Support integration of antibiotic stewardship support tools into EHRs
- ❖ Improve capture and real-time reporting of ADEs, admissions and readmissions along with community-based measures of utilization
- ❖ Promoting the use of Patient Portals and patient control of their Medical Records
- ❖ Integrate CDC's NHSN reporting system to track and detect infections such as c.difficile and urinary tract infections (UTIs)
- ❖ Interim outcome achievement reporting
- ❖ LAN development to support all Aims
- ❖ Active participation in National webinars
