Calculation of Tax

- Line 1: Total gallons of product available. Add the total of prior month's ending inventory plus all receipts of compressed natural gas received during the reporting period.
- Line 2: Total gallons sold and placed into vehicles on which the Tennessee compressed natural gas tax must be collected and remitted. Enter the total number of gallons delivered into a licensed vehicle during the reporting period.
- Line 3: Tax Due. Multiply Line 2 by the compressed natural gas tax rate (see tax rate table below.)
- Line 4: Credit memo balance. If your account has a credit balance from an overpayment on a prior return, enter the amount on this line.
- Line 5: Penalty. If filed late, compute penalty at **5%** of the tax due (Line 3 minus Line 4) for each 30 day period or portion thereof for which the tax is delinquent, up to a maximum of **25%** of the delinquent amount. The minimum penalty is **\$15** for the delinquent filing of a return
- Line 6: Interest. Interest is due on any amount of tax that is paid after the statutory due date of the return. The interest rate is determined in accordance with Tenn. Code Ann. § 67-1-801. The current interest rate can be found at www.tn.gov/revenue. If the payment is late, apply the interest rate to the total tax due (Line 4 minus Line 5).
- Line 7: Total amount due. Add Lines 3, 5, and 6; subtract Line 4.
