
Career and Technical Education Plan

The Background:

In July 2018, the federal Strengthening Career and Technical Education for the 21st Century Act was enacted. Pursuant to that legislation, each state must consult with stakeholders to develop a four (4)-year plan in order to receive funds under the newly authorized Carl D. Perkins Career and Technical Education Act.

This item presents Tennessee's draft plan for informational purposes to the State Board of Education. The public comment period on the draft plan is open until January 31, 2020, and the department may share a revised version shortly before the board meeting.

The Recommendation:

This item is for informational purposes only; no action is required.
