Tennessee Social Studies Standards

Introduction

The Process

The Tennessee State Social Studies Standards were reviewed and developed by Tennessee educators, historians, and advocates for social studies education for Tennessee students. The rigorous process used to develop the standards in this document began with a public review of the then-current standards during summer 2022. After receiving more than 114,000 comments, a committee comprised of 21 Tennessee social studies educators spanning elementary through higher education reviewed each standard. The committee considered every standard, utilizing the public feedback and the expertise of the group. The committee kept some standards as written, edited or revised others, added examples, clarified the wording of standards, moved standards to different grades, and wrote new standards to support coherence and rigor.

The revised standards were posted online a second time for public review during spring 2023. Over 80,800 reviews were submitted by Tennesseans during this additional review period. Following the second public review period, the standards were reviewed by the Social Studies Standards Recommendation Committee (SRC).

The 10-member SRC, appointed by the Governor, Lieutenant Governor, and Speaker of the House of Representatives, convened for four virtual pre-meetings as well as in-person for a week to do the majority of the work. The SRC utilized their personal knowledge and expertise along with the public feedback survey to guide their final recommendations for the draft standards. The SRC finished all of their work on September 28, 2023. These proposed standards will go before the Tennessee State Board of Education on first reading at their November 3, 2023 board meeting.

The final reading and adoption of the revised social studies standards is expected to occur during the state board's February 2024 meeting, and the revised social studies standards will be implemented in the 2026-27 school year.

It should be noted that the standards are what students should know, understand, and be able to do by the end of a grade level or course; however, the standards do not dictate how a teacher should teach them. In other words, the standards do not dictate curriculum.

Preparing Students for the Future

In order to become college and career ready, Tennessee students must have a strong background in social studies. It is through social studies that students prepare for their futures by opening doors to a more diverse, competitive workforce and responsible citizenry. Teachers should center instruction on inquiry-based models, which require students to engage in critical thinking, self-assessment, reasoning, problem-solving, collaboration, and investigation in order to make connections in new and innovative ways as they progress through social studies education. Our current students are our future leaders, and, as such, they need to be able to understand the complexity of the world. Students should be aware of the changing cultural and physical environments of Tennessee, the United States, and the world; know and understand the past; read, write, and think deeply; and act in ways that promote the common good. Social studies offers the critical knowledge necessary to create a framework for understanding the systems of society and becoming college, career, and civics ready.

The Tennessee Social Studies Standards lay out a vision of these vitally important disciplines and describe what all students should know and be able to do at the end of each grade/course level. The diverse committee of educators involved in the review and development of the social studies standards came together from across the state of Tennessee and focused on ensuring that the standards are:

- ✓ Challenging, but age appropriate
- ✓ Attainable for teachers and students
- ✓ Clear and measurable
- ✓ Focused on key ideas with real-world relevancy
- ✓ Connected to overarching themes that support social studies skills and thinking
- ✓ Comprehensive and have a clear progression from grade to grade

Social Studies in Elementary Grades

Research consistently demonstrates that social studies receives the least amount of instructional time in the elementary grades, when compared to ELA/literacy and math. In particular, students from low socioeconomic backgrounds have less access to social studies instruction compared to peers with higher socioeconomic backgrounds. However, social studies instruction in elementary grades is necessary to ensure that students develop literacy skills and prepare for college, careers, and civic life. In elementary schools, an increase in time devoted to social studies instruction resulted in higher scores on the NAEP (National Assessment of Educational Progress)—which is often referred to as the Nation’s Report Card—for fourth grade U.S. History, which demonstrates a correlation between time spent on social studies-specific instruction and learning.

Moreover, the benefits of social studies instruction extend beyond the discipline itself; social studies instruction develops content knowledge which makes struggling readers stronger readers. Struggling readers with strong background knowledge display better reading comprehension than strong readers with low background knowledge (Recht and Leslie, 1988). In a study of second graders who had 60 lessons of literacy-

rich social studies instruction, students scored 23 percent higher on reading assessments (Halvorsen and Duke, 2012).

Beyond literacy development, social studies instruction prepares students for citizenship. Students who receive effective social studies instruction are more likely to vote and discuss politics at home, are four times more likely to volunteer and work on community issues, and are more confident in their ability to speak publicly and communicate with their elected representatives (Campaign for the Civic Mission of Schools, “Guardian of Democracy: The Civic Mission of Schools.” 2011).

The Council of Chief State School Officers created a graphic that shows the marginalization of social studies and the impact it has on student learning (See Appendix A). This graphic is included in this document to show the importance of social studies education and the impact that effective social studies instruction can have on students.

The Tennessee Academic Standards for Social Studies Document

By presenting all of Tennessee’s social studies standards in one document, rather than breaking up the standards into separate grade levels, the structure of this document emphasizes how the content builds as students progress through school, leading to postsecondary and workforce readiness. The connections shown from grade to grade and course to course through the seven content strands and six social studies practices, are outlined on the following pages; these connections are highlighted by presenting content linearly. The K-12 standards were intentionally designed to move through content sequentially, because it is important to understand the progression of history through time.

In grades K-5, the standards signal the importance of laying a solid foundation in how the world works, geography, Tennessee history, and United States history. The middle grades, 6-8, solidify that foundation while increasing the rigor of the content through learning about both world and United States history. Finally, grades 9-12 focus on contemporary topics that may not be appropriate for younger students, as well as the purposeful preparation of students to be citizens of both the United States and the world. As students progress from one grade level to the next, it is important that they have learned the entirety of the previous years’ content. Because of the linear nature of the standards, it is important that teachers familiarize themselves with standards in the previous and subsequent grades to understand how the grade-level content that they teach fits into students’ overall development of historical content. The standards are a progression, and teachers will need to assess students’ understanding of the previous year’s standards before they build students’ knowledge with the standards for their current grade.

How to Read the Standards

Each course/grade level contains a theme and broad topics, which are further clarified with content standards. The revised social studies standards are organized using the following components: **Course Title/Abbreviation, Course Description, Topic, Standard Number, Content Standard, and Content Strand** (see fig. 1).

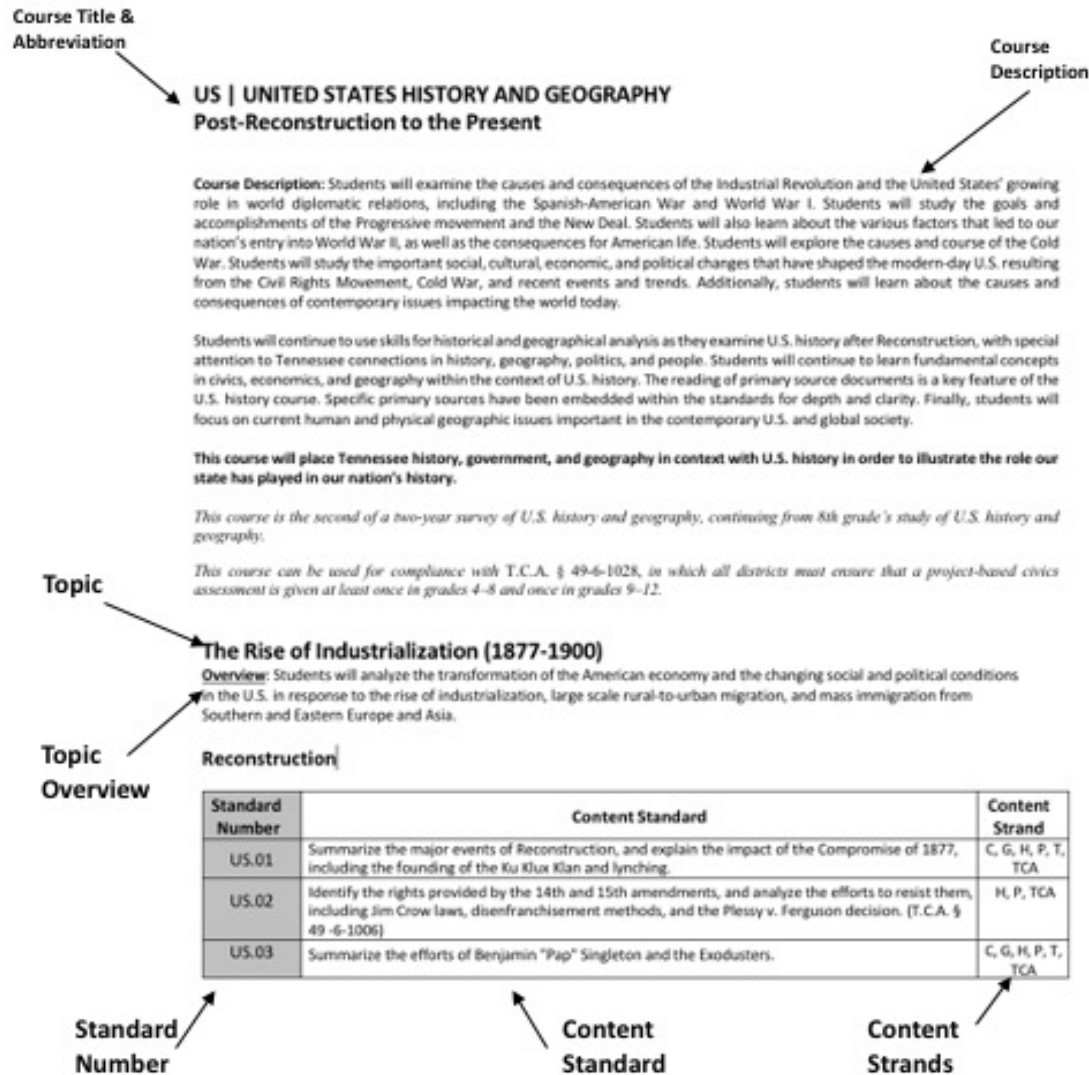

Figure 1

Course Title & Abbreviation: the grade level or course title along with a shortened corresponding letter or number.

Example: **US | United States History and Geography: Post-Reconstruction to the Present**

Course Description: the focus for a particular grade/course, given through a descriptive narrative.

Example: (See Tables 1 and 2)

Topic: the overarching topics for a particular set of standards; can also be known as time period or era.

Example: **The Rise of Industrialization (1877-1900)**

Topic Overview: a brief statement explaining each topic of a particular set of standards.

Example: **Students will analyze the transformation of the American economy and the changing social and political conditions in the U.S. in response to the rise of industrialization, large scale rural-to-urban migration, and mass immigration from Southern and Eastern Europe and Asia.**

Standard Number: the course abbreviation and the corresponding number that accompanies each standard.

Example: **US.03**

Content Standard: the essential knowledge to be learned at each grade level or within each course.

Example: **Summarize the efforts of Benjamin "Pap" Singleton and the Exodusters.**

Content Strands: the seven disciplines within social studies: Culture (C), Economics (E), Geography (G), History (H), Politics/Government (P), Tennessee (T), and Tennessee Code Annotated (TCA). Tennessee (T) signifies a specific connection to Tennessee. Tennessee Code Annotated (TCA) indicates that the content of that standard is required by state law. Additionally, the applicable statute is cited within the standard.

Examples: **C, E, G, H, P, T, TCA**

Standards Progression and Course Descriptions

Table 1

Grade	Course Title	Course Description
K	The World Around Us	Kindergarten students will build upon experiences with their families, schools, and communities as an introduction to social studies.
1	Tennessee’s Place in the United States	First grade students will learn about Tennessee and its place in the U.S. through culture, economics, geography, government/civics, and history.
2	Life in the United States	Second grade students will learn about life in the United States, including culture, economics, geography, government/civics, and history of our country by studying their identity as citizens and how our nation operates.
3	The History of the United States: Early Americans to Westward Expansion	Third grade students will learn about Indigenous People of North America through the growth and development of the U.S. through Manifest Destiny.
4	The History of the United States: Prior to the Civil War to the Civil Rights Movement	Fourth grade students will learn about the challenges facing the U.S. during the 19 th and 20 th centuries, with an emphasis on major American wars and events that changed our history.
5	Part 1: Tennessee History	Fifth grade students will learn about the history of Tennessee, including the cultural, geographic, economic, and political influences on the state and its development.
	Part 2: Geography	Fifth grade students will learn geographical skills, world geography, U.S. and Tennessee geography.
6	World History and Geography: Early Civilizations Through the Fall of the Western Roman Empire	Sixth grade students will learn about the cultural, geographical, political, and governmental beginnings of ancient civilizations through the fall of the Western Roman Empire.
7	World History and Geography: The Middle Ages to the Exploration of the Americas	Seventh grade students will learn about the social, cultural, geographical, political, and technological changes of Western Civilization in Europe as well as the geographic regions of East Asia, West Africa, and Southwest Asia and Northern Africa.
8	United States History and Geography: Colonization of North America to Reconstruction	Eighth grade students will learn about the settlement and founding of the U.S. through Reconstruction and study the history, economics, culture, government, and geography of Tennessee in context to illustrate the role our state has played in American history.

Table 2

Course Code	Course Title	Course Description
AAH	African American History	Students will learn about the life and contributions of African Americans from pre-colonized Africa through the contemporary United States.
AH	Ancient History	Students will learn about the major periods and civilizations of ancient history, from prehistoric times to 1500 CE.
CI	Contemporary Issues	Students will use inquiry skills to learn about the issues that impact the contemporary world and engage in research and problem solving in order to better understand and assess significant current issues.
E	Economics* (1/2 credit)	Students will learn about the allocation of scarce resources and the economic reasoning used by consumers, producers, savers, investors, workers, and voters and explore various economic concepts.
GC	United States Government and Civics* (1/2 credit)	Students will learn about the purposes, principles, and practices of the U.S. government as established by the Constitution.
P	Psychology	Students will learn about the development of scientific attitudes and skills, including critical thinking, problem solving, and scientific methodology, through connections between content areas of psychology and relating psychological knowledge to everyday life.
S	Sociology	Students will learn about the ways sociologists view society and how they study the social world.
TN	Tennessee History	Students will learn about the history of Tennessee, including the cultural, geographic, economic, and political influences upon that history.
US	United States History and Geography: Post-Reconstruction to the Present*	Students will learn about the Industrial Revolution, the Progressive Era, the U.S. role in the Spanish-American War, World War I, and World War II, as well as the Cold War, Civil Rights Movement, and the contemporary U.S.
WG	World Geography	Students will learn about geography in terms of the global perspectives, basic concepts and fundamental questions of geography, and where phenomena occur and explore reasons why phenomena occur in those locations.
W	World History and Geography: The Industrial Revolution to the Contemporary World*	Students will learn about the rise of the nation-state in Europe, the origins and consequences of the Industrial Revolution, political reform in Western Europe, imperialism across the world, and the economic and political roots of the contemporary world.

Examples Found Within the Standards

Within the standards, you will find examples to aid in the teaching of specific standards. These examples are written in a variety of ways and should be interpreted based on the following explanations in Table 3 (below):

Table 3

Term	Definition	Example	Interpretation
i.e.	“that is” or “in other words”; a complete list of examples	WG.09 Describe the purposes and uses of geospatial technologies (i.e. , GIS, GPS, remote sensing), and apply them in relevant contexts.	The geospatial technologies that students should apply to relevant contexts are GIS, GPS, and remote sensing.
e.g.	“for example”; examples that could be used, but are not limited to	AH.05 Identify and locate on a map early civilizations (e.g. , China, Egypt, Indus-Saraswati River Valley, Mesopotamia), and explain why civilizations arose in those places.	When identifying , locating and explaining why civilizations rose to power, students should locate China, Egypt, Indus-Saraswati River Valley and Mesopotamia AND any other location(s) that the teacher deems important.
“such as”	Introduces an example or examples of something mentioned	K.08 Use personal directions such as : up, down, near, far, left, right, in front of, and behind.	Students should use the up, down, near, far, left, right, in front of, and behind as examples or as an introduction.
“including”	Used to say that a person or thing is part of a particular group	5.26 Analyze the causes, course, and consequences of the Spanish-American War, including : <ul style="list-style-type: none"> • Buffalo Soldiers • Imperialism • Rough Riders • USS Maine • Yellow journalism 	Students should analyze the causes, course, and consequences of the Spanish-American War (Buffalo Soldiers, imperialism, Rough Riders, USS Maine, and yellow journalism). Teachers also have the opportunity to add more examples to fit their students’ needs.
“examples”	Context may be to “provide,” “describe,” etc.; it allows teachers and students to select their own examples to apply to the standard	E.37 Define externalities, and identify examples of them.	This is dependent on curriculum; but, a student could note that increased levels of education lead to a lower unemployment rate.

Content Strands

Content strands are found alongside the content standards and guide a teacher’s instruction in the classroom. The standards are focused on seven disciplines of social studies and represent a way of categorizing knowledge about the human experience. The content strands help to organize the various themes of social studies instruction from kindergarten through high school, at age-appropriate levels. The content strands can be viewed below in Table 4. *For ease of reference, the content strands and corresponding codes are posted at the bottom on each page of the standards document. Please note that some grade levels/courses intentionally do not have content strands, as the standards are already grouped by the content strands.*

Table 4

Content Strand Code	Content Strand Title	Content Strand Definition
C	Culture	Students will use culture and cultural diversity to understand how human beings create, learn, share, and adapt to culture and appreciate the role of culture in shaping their lives and society, as well the lives and societies of others.
E	Economics	Students will use economic reasoning skills and knowledge of major economic concepts, issues, and systems to make informed choices as producers, consumers, savers, investors, workers, and citizens in an interdependent world.
G	Geography	Students will use knowledge of geographic locations, patterns, and processes to show the interrelationship between the physical environment and human activity and to explain the interactions that occur in an increasingly interdependent world. Students will use knowledge of perspectives as well as practices and products of cultural, ethnic, and social groups to analyze the impact of their commonality and diversity within local, national, regional, and global settings.
H	History	Students will use materials drawn from the diversity of the human experience to analyze and interpret significant events, patterns, and themes in the history of Tennessee, the United States, and the world.
P	Politics/ Government	Students will use knowledge of the purposes, structures, and processes of political systems at the local, state, national, and international levels to understand that people create systems of government as structures of power and authority to provide order, maintain stability, and promote the general welfare. Students will use knowledge of the rights and responsibilities of citizenship in order to examine and evaluate civic ideals and to participate in community life and the American democratic system.
T	Tennessee	Students will use materials drawn from various sources to explore history through a Tennessee lens while focusing on the events, patterns, and themes that impacted both the U.S. and Tennessee.
TCA	Tennessee Code Annotated	Students will learn mandatory content, as specified in the Tennessee Code Annotated (i.e., state law).

Social Studies Practices (SSP)

Social studies practices are specific skills that students should apply when learning social studies. Like the social studies standards, the social studies practices increase in rigor as students progress through their educational experience. Students should apply these skills to create and address questions that will guide inquiry and critical thinking. These practices should be regularly applied throughout the year and are not written as stand-alone standards. Students will progress through the inquiry cycle by analyzing primary and secondary sources to construct and communicate their conceptual understanding of the content standards (SSP.1-SSP.4) and to develop historical and geographic awareness (SSP.5- SSP.6). The social studies practices are listed in Table 5.

Interconnectedness of the Standards, Content Strands, and Social Studies Practices

The Tennessee Academic Standards for Social Studies were designed to engage students in inquiry-based learning through the social studies practices—particular skills students use to interact with content—framed by the content strands, which are the lenses through which students view the content and their interactions with it. The content strands are centered on the idea of inquiry through the Social Studies Practices and include a set of interconnected and mutually supportive ideas that frame the ways students learn social studies content. By focusing on inquiry, teachers emphasize the disciplinary concepts that support students as they develop the capacity to know, analyze, explain, and argue about challenges in the world and throughout history.

Graphic 1 (below) provides a visual representation of standards-based instruction in social studies by emphasizing the application of knowledge within the content strands as students develop questions, plan inquiries, apply concepts and tools, evaluate and use evidence, and communicate conclusions.

Graphic 1

The content standards are the essential knowledge that students should learn in order to be social studies-literate citizens. Traditionally, the centerpiece of social studies has been history. An understanding of our history is critical to being an informed and active citizen of the United States. Students must be aware of the past and its impact on the present. However, there is a difference between learning history and learning **from** history. Learning from history requires more than the memorization of people, places, dates, and events. It requires that students be able to use both the social studies practices and the content strands to explain causal connections between events, use historical knowledge to investigate problems, analyze issues in terms of historical knowledge, recognize the links between the past and the present through the exploration of current events, and understand that historical figures were complex people facing complex problems.

In other words, the Tennessee Academic Standards for Social Studies provide the information we want students to know, the content strands are the different lenses through which to view the information, and the social studies practices are the skills that students should employ and become proficient in as they analyze information.

Social Studies Literacy

Literacy is the ability to read, write, listen, and speak to make sense of text (e.g., primary/secondary sources, audio clips, videos, political cartoons, maps). Although social studies encompasses many aspects of literacy, it is a distinct discipline from English Language Arts (ELA) with different purposes, pedagogy, assessments, and authentic experiences. In social studies, students will read, write, speak, and listen as a method for learning, but the outcomes of instruction are linked to content explicitly taught during social studies instruction. Students learn through the lenses of the content strands and evidence of their learning should reflect mastery of social studies content, concepts, and skills, along with disciplinary literacies. Though literacy practices are embedded within the revised social studies standards through the social studies practices, the inquiry-centered instructional approach of social studies is distinct to the discipline.

Literacy practices (e.g., gathering sources, examining sources, synthesizing information, framing an argument using evidence) are embedded within the revised social studies standards through the social studies practices. Through the practices, students will have opportunities to develop and reinforce disciplinary literacy skills while purposefully building conceptual content knowledge and disciplinary skills necessary for reading comprehension and preparation for citizenship.

Literacy in social studies includes: a student's knowledge of the world; a student's ability to understand and express historical ideas; and a student's use of critical thinking, self-assessment, reasoning, problem-solving, collaboration, research, and investigation to make connections in new and innovative ways.

Literacy is a key focus of the social studies practices and should be integrated throughout all coursework. Social studies content mastery includes conducting short, as well as sustained, investigative research to generate and answer questions or solve problems. It also involves synthesizing multiple sources on a subject to construct and communicate an understanding of the subject under investigation. Students should be reading and writing frequently in the classroom to make historical arguments and conclusions, while supporting their claims with evidence. A student's ability to read and interpret multiple texts is essential to teaching him or her how to make evidence-based historical arguments. In other words, proficiency in both ELA and social studies are necessary for students to become productive citizens.

Geography: More than just Maps

More than ever, our world is interconnected, and today's students need to understand how complex and dynamic human and natural systems interact in order to make smart decisions and function effectively. Geographic knowledge helps people make decisions about "Where can I be safe, successful, and happy in my daily activities?" and "How can my community create and sustain a healthy environment?" Further, geographic inquiry helps people understand and appreciate their own place in the world and fosters curiosity about Earth's wide diversity of environments and cultures.

The study of geographic frameworks is essential to the comprehension of how the past has been shaped, what changes have been made, and how our world works today. Geographic reasoning rests on the deep knowledge of the earth's physical and human features, including the locations of places and regions; the distribution of landforms and water bodies; and historic changes in political boundaries, economic activities, and cultures. Geographers seek to understand where things are, why they are there, and how things develop and change over time. Geographic reasoning is best achieved by investigating human and physical geography.

Geographic reasoning requires the use of spatial and environmental perspectives; skills in asking and answering questions; and the ability to apply geographic representations including maps, imagery, and geospatial technologies. A spatial perspective is about “where-ness.” Where are people and things located? Why are they there? What are the consequences? An environmental perspective views people as living in interdependent relationships within diverse environments. Thinking geographically requires knowing that the world is a set of complex ecosystems interacting at multiple scales that structure the spatial patterns and processes that influence our daily lives. Geographic reasoning brings societies and nature under the lens of spatial analysis and aids in personal and societal decision making and problem solving.

Tennessee History

Per state law (Pub. Ch. 482), students are required to take a course in Tennessee history. This course is essential for all Tennessee students so that they know and understand the unique heritage and history of our state. The Tennessee Academic Standards for Social Studies meet this requirement in several ways. Specifically, relevant standards are marked in the content strand column with a “T” to help guide a student’s exploration of Tennessee’s place in the U.S. and the world. In order to further comply with this law, the standards also include the following:

- A required semester of Tennessee history in 5th grade.
- An elective course in Tennessee history at the high school level.
- Explicitly-stated Tennessee content throughout grade bands (i.e., Kindergarten, 1st, 2nd, 3rd, 4th, 8th grades, and High School U.S. History)
- Embedded and implied Tennessee content in the standards.

Table 6 breaks down the different types of Tennessee-specific content featured in the standards document.

Table 6

Content Type	Example	Explanation
<p>Explicit Content: Specific Tennessee content is stated clearly and in detail within a standard.</p>	<p>1.20 Identify Tennessee symbols, including: state flag, state tree, state flower, state bird, state animal, and the significance of the state nickname.</p>	<p>This elementary school standard focuses on the specific symbols of Tennessee and is completely focused on state history.</p>
<p>Embedded Content: Specific Tennessee content is explicitly incorporated as an essential part of a standard.</p>	<p>US.03 Summarize the efforts of Benjamin "Pap" Singleton and the Exodusters.</p>	<p>This high school U.S. History and Geography standard focuses on the efforts of Benjamin “Pap” Singleton from Nashville. This important piece of Tennessee history serves as important context to the end of Reconstruction in Tennessee.</p>

<p>Implied Content: Specific Tennessee content is suggested without being explicitly stated within a standard.</p>	<p>7.54 Explain the impact of geographic features on North American Indian cultures (i.e., Northeast, Southeast, and Plains), including: clothing, housing, and agriculture.</p>	<p>This middle school World History and Geography standard focuses on American Indians, including those of the Southeast. Although the specific tribes of the Southeast are not stated, examples of tribes include the Cherokee, who have a long-standing history in Tennessee.</p>

Civics Instruction in Tennessee

Per state law (T.C.A. § 49-6-1028), all districts must ensure that a project-based civics assessment is given at least once in grades 4-8 and once in grades 9-12. Project-based civics assessments are developed by the district to ensure students are being taught the learning objectives contained within the social studies standards and can demonstrate an understanding of civics.

Per state law (T.C.A. § 49-6-408A), students must take and pass (70 percent or higher) the United States citizenship and immigration test during the student's high school career (i.e., grades 9-12). Schools in which all seniors earning a regular diploma score 85 percent or higher on the U.S. civics test will be recognized by the department as a U.S. Civics All-Star School.

4 | FOURTH GRADE SOCIAL STUDIES

The History of the United States: Prior to the Civil War to the Civil Rights Movement

Course Description: Fourth grade students will learn about challenges facing the United States during the 19th and 20th centuries, with an emphasis on major American wars and events that changed our history. Students will explore the causes and effects of the Civil War and Reconstruction, industrialization and significant events of the Gilded Age and Progressive Era. Students will also explore the nation’s growing role in world affairs during World War I and World War II. In addition, students will analyze structures of power and authority. Finally, students will examine and describe the key events and accomplishments of the post-war period and Civil Rights Movement. Students will utilize primary source documents, geographic tools, analysis, and critical thinking within this concentrated study of U.S. history.

This course can be used for compliance with T.C.A. § 49-6-1028, in which all districts must ensure that a project-based civics assessment is given at least once in grades 4–8 and once in grades 9–12.

6 | SIXTH GRADE SOCIAL STUDIES

World History and Geography: Early Civilizations Through the Fall of the Western Roman Empire

Course Description: Sixth grade students will learn about the cultural, geographical, political, and governmental beginnings of ancient civilizations through the fall of the Western Roman Empire. This course will also teach students about the historical context of ancient and major world religions and will follow a common template for major world religions so as to not promote any religion. Major world religions are introduced in either 6th or 7th grade.

This course will be the students' first concentrated survey of world history and geography and is designed to help students think like historians, focusing on historical concepts in order to build a foundational understanding of the world. Appropriate primary sources have been embedded in the standards in order to deepen the understanding of world history and geography. Special emphasis will be placed on the development of government, including the beginning of democratic practices.

8 | EIGHTH GRADE SOCIAL STUDIES

United States History and Geography: Colonization of North America to Reconstruction

Course Description: Eighth grade students will learn about the settlement and founding of the U.S. through Reconstruction and study the history, economics, culture, government, and geography of Tennessee in context to illustrate the role our state has played in American history.

This course will place Tennessee history, government, and geography in context with U.S. history in order to illustrate the role our state has played in American history.

This course is the first of a two-year survey of U.S. history and geography and picks up where 7th grade finishes their study of world history. This course is designed to help students think like historians, focusing on historical concepts in order for students to build an understanding of the history of the U.S. Appropriate primary sources have been embedded in the standards in order to enhance students' understanding of the content.

This course can be used for compliance with T.C.A. § 49-6-1028, in which all districts must ensure that a project-based civics assessment is given at least once in grades 4–8 and once in grades 9–12.

CI | CONTEMPORARY ISSUES

Course Description: Students will use inquiry skills to examine the issues that impact the contemporary world. Students will analyze the historical, cultural, economic, and geographic factors that have elevated certain issues to levels of concern in the United States and around the globe. Students will engage in research and problem solving in order to better understand and assess significant current issues.

Grades 9-12

Social Studies Practices

Overview: Students will apply these skills to create and address questions that will guide inquiry and critical thinking. These practices should be regularly applied throughout the year. Students will progress through the inquiry cycle (SSP.01-SSP.04) by analyzing primary and secondary sources to construct and communicate their conceptual understanding of the content standards and to develop historical and geographic awareness (SSP.05- SSP.06).

Practice Number	Social Studies Practice
SSP.01	Collect data and information from a variety of primary and secondary sources, including: <ul style="list-style-type: none">• Printed materials• Graphic representations• Field observations/Landscape analysis• Artifacts• Media and technology sources• Oral History
SSP.02	Critically examine a primary or secondary source in order to: <ul style="list-style-type: none">• Extract, summarize, and paraphrase significant ideas and relevant information• Discern differences between evidence and assertion• Recognize the significance of author’s purpose, point of view, and bias• Draw logical inferences and conclusions• Assess the strengths and limitations of arguments
SSP.03	Synthesize data from a variety of sources in order to: <ul style="list-style-type: none">• Establish accuracy and validity by comparing sources to each other• Recognize disparities among multiple accounts• Frame appropriate questions for further investigation

Practice Number	Social Studies Practice
SSP.04	Construct and communicate arguments by citing supporting evidence to: <ul style="list-style-type: none"> • Demonstrate and defend an understanding of ideas • Compare and contrast viewpoints • Illustrate cause and effect • Predict likely outcomes • Devise new outcomes or solutions • Engage in appropriate civic discourse
SSP.05	Develop historical awareness by: <ul style="list-style-type: none"> • Recognizing how and why historical accounts change over time • Perceiving and presenting past events and issues as they might have been experienced by the people of the time, with historical empathy vs. present- mindedness • Evaluating how unique circumstances of time and place create context and contribute to action and reaction • Identifying patterns of continuity and change over time, making connections to the present
SSP.06	Develop geographic awareness by: <ul style="list-style-type: none"> • Analyzing and determining the use of diverse types of maps based on the origin, authority, structure, context, and validity • Using the geographic perspective to analyze relationships, patterns, and diffusion across space at multiple scales • Analyzing locations, conditions, and connections of places and using maps to investigate spatial associations among phenomena • Examining how geographers use regions and how perceptions of regions are fluid across time and space • Analyzing interaction between humans and the physical environment

Scientific Inquiry Domain

Research Methods, Measurement, and Statistics

Overview: Students will describe research methods and measurements used to study behavior and mental processes. Students will identify ethical issues in research with human and animal subjects. Students will also explain basic concepts of data analysis.

Standard Number	Content Standard
P.01	Describe the scientific method and its role in psychology.
P.02	Describe and compare a variety of quantitative and qualitative research methods, including: <ul style="list-style-type: none">• Correlations• Interviews• Experiments• Narratives• Focus groups• Surveys
P.03	Explain systematic procedures used to improve the validity of research findings, including external validity.
P.04	Describe how and why psychologists use animal subjects in research, and identify ethical guidelines to follow in performing this type of research.
P.05	Identify ethical standards psychologists must follow regarding research with human participants.
P.06	Explain descriptive statistics and qualitative data and how they are used by psychological scientists.
P.07	Define correlation coefficients, and explain their appropriate interpretation.
P.08	Interpret graphical representations of data, as used in both quantitative and qualitative methods.
P.09	Explain statistical concepts, such as statistical significance, confidence intervals, limitations, and effect size.
P.10	Explain how validity and reliability of observation and measurements relate to data analysis and interpretation.

Biopsychology Domain

Biological Bases of Behavior

Overview: Students will explore the structure and function of the nervous system in humans, the interaction between biological factors and experience, and methods and issues related to biological advances.

Standard Number	Content Standard
P.11	Identify and describe the major structures of the brain.
P.12	Identify and describe the methodology, including the tools, used to study the brain.
P.13	Identify and discuss the functions of the central nervous system.
P.14	Discuss issues related to scientific advances in neuroscience and genetics.
P.15	Identify and describe the structure and function of the endocrine system and its impact on human behavior, including hormonal effects on the immune system.
P.16	Describe the interactive effects of heredity and environment.

US | UNITED STATES HISTORY AND GEOGRAPHY

Post-Reconstruction to the Present

Course Description: Students will examine the causes and consequences of the Industrial Revolution and the United States' growing role in world diplomatic relations, including the Spanish-American War and World War I. Students will study the goals and accomplishments of the Progressive movement and the New Deal. Students will also learn about the various factors that led to our nation's entry into World War II, as well as the consequences for American life. Students will explore the causes and course of the Cold War. Students will study the important social, cultural, economic, and political changes that have shaped the modern-day United States resulting from the Civil Rights Movement, Cold War, and recent events and trends. Additionally, students will learn about the causes and consequences of contemporary issues impacting the world today.

Students will continue to use skills for historical and geographical analysis as they examine U.S. history after Reconstruction, with special attention to Tennessee connections in history, geography, politics, and people. Students will continue to learn fundamental concepts in civics, economics, and geography within the context of U.S. history. The reading of primary source documents is a key feature of the U.S. history course. Specific primary sources have been embedded within the standards for depth and clarity. Finally, students will focus on current human and physical geographic issues important in the contemporary U.S. and global society.

This course will place Tennessee history, government, and geography in context with U.S. history in order to illustrate the role our state has played in our nation's history.

This course is the second of a two-year survey of U.S. history and geography, continuing from 8th grade's study of U.S. history and geography.

This course can be used for compliance with T.C.A. § 49-6-1028, in which all districts must ensure that a project-based civics assessment is given at least once in grades 4–8 and once in grades 9–12.

WG | WORLD GEOGRAPHY

Course Description: Students will examine the global perspectives, basic concepts, and fundamental questions of geography. Students will explore where phenomena occur and reasons why phenomena occur in those locations. Students will focus on the ways through which all places on Earth are interconnected and how the human use of Earth's surface varies. Students will also explore various topics, including geographic skills and tools, physical processes, natural resources, cultural geography, political geography, population and migration, economic development and interdependence, and urbanization.

Grades 9-12

Social Studies Practices

Overview: Students will apply these skills to create and address questions that will guide inquiry and critical thinking. These practices should be regularly applied throughout the year. Students will progress through the inquiry cycle (SSP.01-SSP.04) by analyzing primary and secondary sources to construct and communicate their conceptual understanding of the content standards and to develop historical and geographic awareness (SSP.05- SSP.06).

Practice Number	Social Studies Practice
SSP.01	Collect data and information from a variety of primary and secondary sources, including: <ul style="list-style-type: none">• Printed materials• Graphic representations• Field observations/Landscape analysis• Artifacts• Media and technology sources• Oral History
SSP.02	Critically examine a primary or secondary source in order to: <ul style="list-style-type: none">• Extract, summarize, and paraphrase significant ideas and relevant information• Discern differences between evidence and assertion• Recognize the significance of author’s purpose, point of view, and bias• Draw logical inferences and conclusions• Assess the strengths and limitations of arguments
SSP.03	Synthesize data from a variety of sources in order to: <ul style="list-style-type: none">• Establish accuracy and validity by comparing sources to each other• Recognize disparities among multiple account• Frame appropriate questions for further investigation

Practice Number	Social Studies Practice
SSP.04	Construct and communicate arguments by citing supporting evidence to: <ul style="list-style-type: none"> • Demonstrate and defend an understanding of ideas • Compare and contrast viewpoints • Illustrate cause and effect • Predict likely outcomes • Devise new outcomes or solutions • Engage in appropriate civic discourse
SSP.05	Develop historical awareness by: <ul style="list-style-type: none"> • Recognizing how and why historical accounts change over time • Perceiving and presenting past events and issues as they might have been experienced by the people of the time, with historical empathy vs. present- mindedness • Evaluating how unique circumstances of time and place create context and contribute to action and reaction • Identifying patterns of continuity and change over time, making connections to the present
SSP.06	Develop geographic awareness by: <ul style="list-style-type: none"> • Analyzing and determining the use of diverse types of maps based on the origin, authority, structure, context, and validity • Using the geographic perspective to analyze relationships, patterns, and diffusion across space at multiple scales • Analyzing locations, conditions, and connections of places and using maps to investigate spatial associations among phenomena • Examining how geographers use regions and how perceptions of regions are fluid across time and space • Analyzing interaction between humans and the physical environment

Geographic Skills and Tools

Overview: Students will learn foundational geographic concepts, including how to use maps, globes, and geospatial technologies, and utilize their geographic content knowledge within the study of world regions and processes.

These standards are meant to be addressed and implemented throughout the duration of the course.

Standard Number	Content Standard	Content Strand
WG.01	Explain geography as a field of inquiry, differentiate between physical and human geography, describe the importance of the spatial perspective, and use spatial thinking skills to analyze global issues.	G
WG.02	Explain how geographers synthesize geographic information from a variety of sources to analyze both human and physical processes in the world's regions, countries, and cities.	G
WG.03	Define and explain the use of major geographic concepts (e.g., location, pattern, place, region, scale, site, and situation).	C, G
WG.04	Define the concept of region, identify different types (e.g., formal, functional, perceptual), and give examples.	C, G, P
WG.05	Read and interpret maps and globes using cardinal directions, latitude and longitude, legends, map scale, and title.	G
WG.06	Identify, use, and evaluate the usefulness of different types of map projections (e.g., Mercator, Robinson, Goode's Homolosine, and Peterson).	G, H
WG.07	Compare the use of physical, political, and thematic maps (e.g., choropleth, dot density, proportional symbol, isoline, cartogram).	G, P
WG.08	Analyze patterns and processes at different scales (e.g., local, national, regional, global).	G, P, T

Physical Process, Natural Resources, and the Environment

Overview: Students will examine the concepts and elements of physical geography, how physical processes have shaped the Earth's surface, and how the presence of natural resources (or lack thereof) influences the distribution of human populations and activities.

Standard Number	Content Standard	Content Strand
WG.12	Describe ways in which different types of physical and natural processes create and shape the surface of the Earth.	G, H
WG.13	Describe how unique weather patterns impact geography and population distribution of a region (e.g., drought, earthquakes, floods, hurricanes, tornadoes).	C, G, H
WG.14	Analyze how people interact with and modify the environment to satisfy basic needs and solve challenges. (e.g., access to fresh water, energy resources, irrigation, transportation, types of housing, and infrastructure).	C, G, H
WG.15	Explain how humans depend on and impact the Earth's resources.	C, E, G, H
WG.16	Analyze the distribution of natural resources, how they have impacted the economies of various world regions, and their connections to global trade.	G, H

Population and Migration

Overview: Students will examine factors that affect the distribution, growth, and movement of human populations around the world and population and migration patterns across major world regions.

Standard Number	Content Standard	Content Strand
WG.17	Compare and contrast the distribution, growth rates, and characteristics of human populations at different scales in terms of settlement patterns and access to natural and economic resources.	C, E, G, H, P, T
WG.18	Analyze the characteristics (e.g., age, gender, life expectancy, natural increase rate) of populations at different scales (e.g., local, national, global), and how they are demonstrated in census data and population pyramids.	C, G, H, T
WG.19	Define and give examples of economic, social, political, and environmental push and pull factors.	C, G, H, P, T
WG.20	Define and give examples of voluntary, forced, interregional, and intraregional migration patterns.	C, G, H, P
WG.21	Analyze past and present trends in human migration and the role of intervening obstacles and opportunities (e.g., economic, social, political, and environmental).	C, G, H, P
WG.22	Describe the impact and challenges of migration on both the sending and receiving countries.	C, G, H, P

Regional Geography

Overview: Students will study culture from a geographic perspective by identifying the predominant culture traits that shape the cultural landscape in each major world region. Students will then use this knowledge to make comparisons between regions and analyze changing cultural patterns.

Standard Number	Content Standard	Content Strand
WG.23	Define the cultural landscape, such as culture hearth, culture traits, and material and nonmaterial culture.	C, G, H
WG.24	Describe major cultural characteristics, physical geography, and economic practices in the regions of North, Central, and South America.	C, G, H, P, E
WG.25	Describe major cultural characteristics, physical geography, and economic practices in the regions of Europe.	C, G, H, P, E
WG.26	Describe major cultural characteristics, physical geography, and economic practices in the regions of Sub-Saharan Africa.	C, G, H, P, E
WG.27	Describe major cultural characteristics, physical geography, and economic practices in the regions of North Africa and Southwest Asia.	C, G, H, P, E
WG.28	Describe major cultural characteristics, physical geography, and economic practices in the regions of East, South, and Southeast Asia.	C, G, H, P, E
WG.29	Describe major cultural characteristics, physical geography, and economic practices in the regions in the South Pacific and Oceania.	C, G, H, P, E
WG.30	Analyze how cultural characteristics (e.g., ethnicity, gender roles, identity, language, religion) link and/or divide regions or societies.	C, G, H, P, E

W | WORLD HISTORY AND GEOGRAPHY

Course Description: Students will study the rise of the nation-state in Europe, the origins and consequences of the Industrial Revolution, political reform in Western Europe, imperialism across the world, and the economic and political roots of the modern world. Students will explain the causes and consequences of the great military and economic events of the past century, including the World Wars, Great Depression, Cold War, and Russian and Chinese Revolutions. Students will study the rise of nationalism and the continuing persistence of political, ethnic, and religious conflict in many parts of the world. Students will explore geographic influences on history, with attention to political boundaries that developed with the evolution of nations from 1750 to the present and the subsequent human geographic issues that dominate the global community. Additionally, students will examine aspects of technical geography and how these innovations continuously impact geopolitics in the contemporary world.

This course is a continuation of the 6th and 7th grade survey courses of world history and geography and is designed to help students think like historians, focusing on historical concepts in order to build a foundational understanding of the world. Appropriate primary sources have been embedded in the standards in order to deepen the understanding of world history and geography. Special emphasis will be placed on the contemporary world and its impact on students today.

Grades 9-12

Social Studies Practices

Overview: Students will apply these skills to create and address questions that will guide inquiry and critical thinking. These practices should be regularly applied throughout the year. Students will progress through the inquiry cycle (SSP.01-SSP.04) by analyzing primary and secondary sources to construct and communicate their conceptual understanding of the content standards and to develop historical and geographic awareness (SSP.05- SSP.06).

Practice Number	Social Studies Practice
SSP.01	Collect data and information from a variety of primary and secondary sources, including: <ul style="list-style-type: none">• Printed materials• Graphic representations• Field observations/Landscape analysis• Artifacts• Media and technology sources• Oral History
SSP.02	Critically examine a primary or secondary source in order to: <ul style="list-style-type: none">• Extract, summarize, and paraphrase significant ideas and relevant information• Discern differences between evidence and assertion• Recognize the significance of author’s purpose, point of view, and bias• Draw logical inferences and conclusions• Assess the strengths and limitations of arguments
SSP.03	Synthesize data from a variety of sources in order to: <ul style="list-style-type: none">• Establish accuracy and validity by comparing sources to each other• Recognize disparities among multiple accounts• Frame appropriate questions for further investigation
