

## REQUEST FOR INFORMATION

- **Contract Number: CNR048**
- **Project: Interstate 24, Bridge Replacement over Spring Street and Oldham Street**
- **Date:**
- **Question:**

1. Please provide a listing of approved landfill sites that will accept soil required to be disposed of under TDEC Special Waste permit. (Project Commitment sheet: 1D EDHZ002) as insufficient information is available to complete a TDEC Special Waste Permit.
2. Please reference Sheets 7 - Utilities Spring Street and 7A - Utilities Oldham Street. Both sheets show numerous existing utilities such as storm, sanitary, and water that are in conflict with the proposed installation of the new footings & piles for the shear wall at each bent. Sheet U1-1 clearly states "There are no utilities in conflict with this project" at each of these bridges. If we foresee existing utility conflicts with our proposed construction, how does the Contractor get compensated for these utility conflicts? Please clarify. Also, it would be helpful if the State could provide As-Builts (Sta, inverts, elev, etc) for these existing utilities.
3. Construction Plan sheet 2G – Special Notes – Traffic Control states – Complete Road Closure will be allowed on weekends from Friday 8pm to Monday 6am. Plan sheet 5A states complete road closures will be allowed on weekends from Friday 9pm to Monday 5am. Which will dictate?

1. Please contact TDEC Division of Solid Waste for questions concerning disposal of toxic materials.
2. Any conflicting utility would be expected to be moved by the utility at the utilities expense.
3. Contract Special Provision 108B will dictate.
