INSTRUCTIONAL BULLETIN NO. 15-06

Standard Traffic Operations Drawings

PURPOSE: Separate Standard Drawings that will be maintained by the Traffic Operations Division from those maintained by the Roadway Design Division.

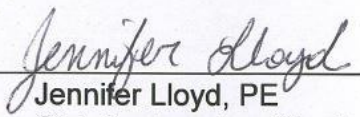

Effective May 15, 2015 for the August 28, 2015 letting, Section V of the Design Guidelines is revised to reflect lighting and utility pole appurtenances, and traffic signal appurtenances being moved from Chapter 1-Standard Roadway Drawings (Traffic Control Appurtenances) to Chapter 2-Standard Traffic Operations Drawings. Standard Structure Drawing will now be shown in Chapter 3-Standard Structure Drawings.

Due to organizational and work flow changes, the Traffic Operations Division will assume responsibility for maintaining and development of Standard Drawings pertaining to lighting, railroad signing, signing and traffic signals. Traffic Operation Standard Drawings will continue to be shown in the Roadway Design Division–Standard Drawings Library but will be separated similar to Structures Division Drawings. Questions regarding Traffic Operations Standard Drawings should be directed to the Traffic Operations Division, Traffic Engineering Office.

All Standard Drawings may be found at the following website:

http://www.tdot.state.tn.us/Chief_Engineer/engr_library/stddrplib.htm

Attached is a copy of revised Section V.

Jennifer Lloyd, PE
Civil Engineering Director
Roadway Design Division
