TITLE SHEET MAP DOCUMENTATION

Acrobat pdf document describing procedure to set up the location map on a title sheet using T.D.O.T. Roadway Design Division maps with MicroStation.

Table of Contents

Download T.D.O.T. Roadway Design Division County map(s) to your Working Project Folder: *2*
Attach the County Map(s) to a New Title Sheet *2*
Method #1: *2*
Method #2: *4*
Title Sheet Levels for Plan Phases *6*
TDOT – Preliminary Title Sheet 6
TDOT – Right-Of-Way Title Sheet 7
TDOT – Construction Title Sheet 8
TDOT – Construction #2 Title Sheet 9
Consultant – Preliminary Title Sheet 10
Consultant – Right-Of-Way Title Sheet 11
Consultant – Construction Title Sheet 12
Consultant – Construction #2 Title Sheet 13
Resurfacing Title Sheet 14
Resurface and Safety Title Sheet 15
ROW Utilities Only Title Sheet 16
Other Mapping files *17*
Using City and Planimetric Maps or Other Non-NAD83 Maps *17*

Download T.D.O.T. Roadway Design Division County map(s) to your Working Project Folder:

1. Go to https://www.tn.gov/content/tn/tdot/roadway-design/design-standards/design-cadd-files/tennessee-map-files-for-microstation.html
2. Download the county map(s) to your project folder. In the **Power Archiver** extraction dialog click on the "**…**" browse button and go to your project folder. Then click on **Start** to download the file.

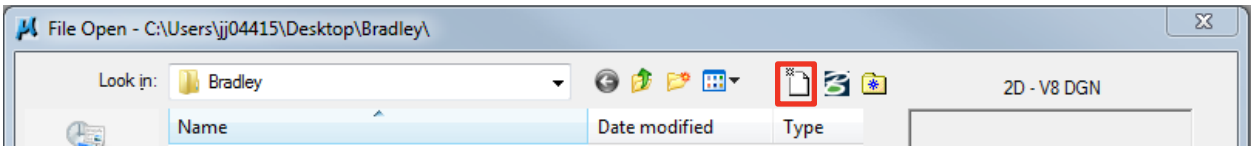
The files are listed by county name. All maps are in NAD 83 English mapping coordinates as set up in the standard T.D.O.T. Design Division English MicroStation DGN seed file. Graphics are set for scale 1" = 5280'

Attach the County Map(s) to a New Title Sheet

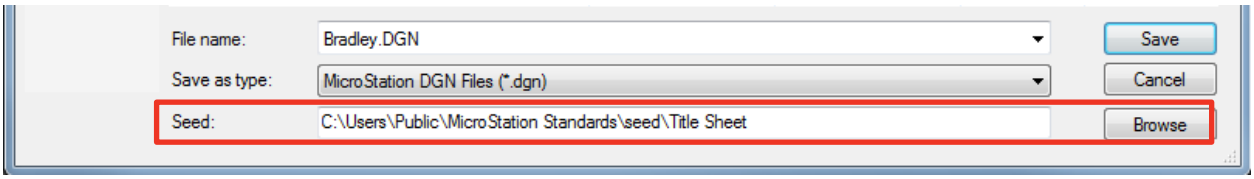
We provide two methods to create a title sheet. The difference between both methods is that method #1 provides both Preliminary and R.O.W. Index Of Sheet embedded in the seed file. In method #2, you will need to attach the index yourself.

Method #1:

1. Create a new DGN file for the title sheet.



2. Select a new seed file named: **Title Sheet.dgn**



3. Name the file **001.sht**. See document CADDV8.pdf, section **Standard Filenames** for information on filenames.

4. Reference your alignment DGN file to the title sheet DGN file.
5. Set the active scale = 5280.

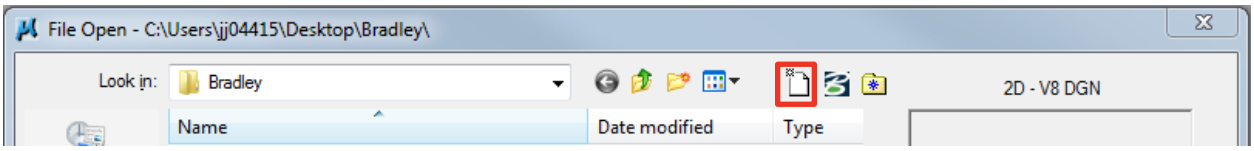
6. Reference the county DGN file to the title sheet DGN file. In MicroStation go to **File > References**. In the **Reference** dialog box, go to **Tools > Attach** and select the county DGN file**.** Set Attachment Method to **Coincident** (or Coincident World) and select **OK**.
7. Fence the map area you need on the title sheet and do a clip boundary for the DGN county file.
   a. In the **Reference File** dialog box, select the county map dgn, go to **Tools > Clip Boundary.** In the MicroStation Tool Settings box set Method to **Active Fence**, click on **Use References Dialog List** and data point to accept.
8. In MicroStation, turn off level **DESIGN - SCRATCH - User 1,**(#30**),** in the county DGN reference and go to **File > Save Settings**.

Note:

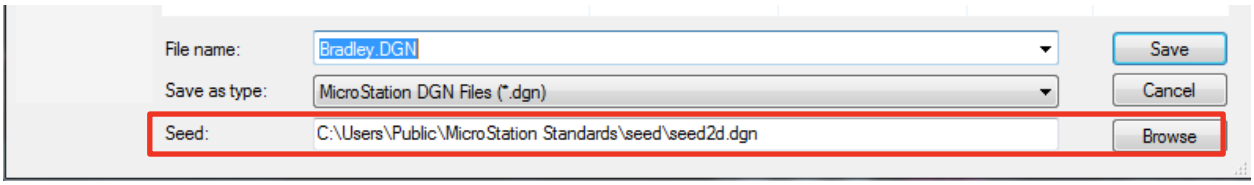
The title sheet will plot at 1” = 5280’.

Method #2:

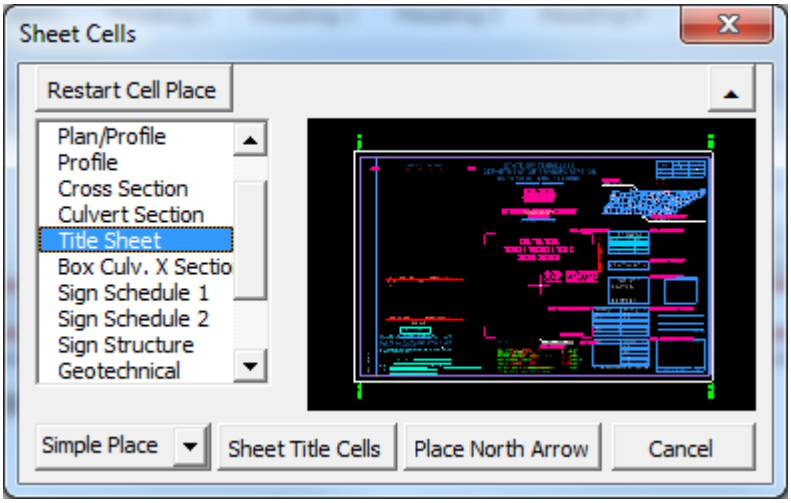
1. Create a new DGN file for the title sheet.



2. Select a new seed file named: **seed2d.dgn**

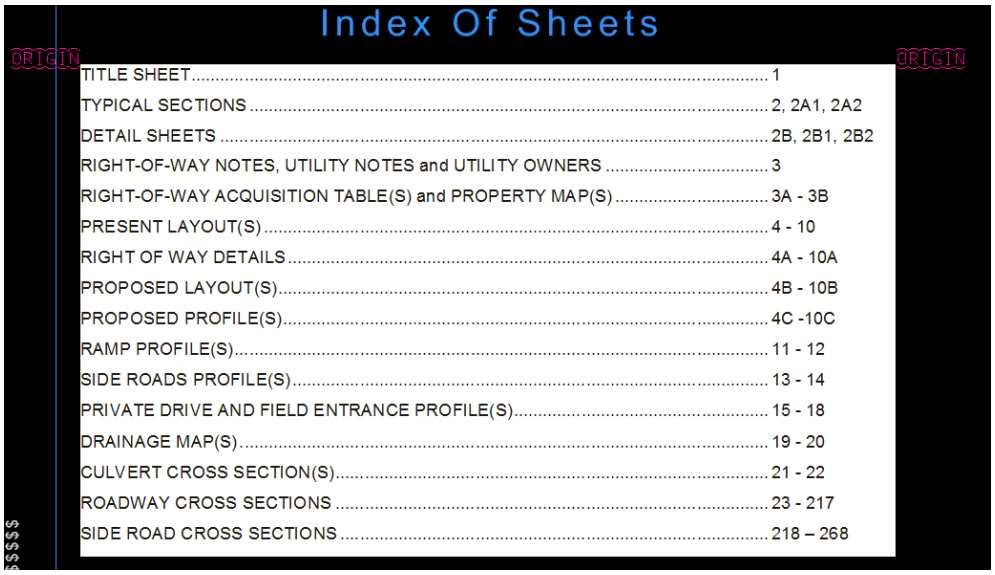


3. Go to T.D.O.T. pulldown and select **Sheet Cells**, select **Title Sheet**



To link the word document for the Preliminary and R.O.W. Index of Sheet, please refer to "**PRELIMINARY INDEX TITLE SHEET.dotx**" or "**RIGHT OF WAY INDEX TITLE SHEET.dotx**" located HERE.

NOTE: The **Preliminary Index Title Sheet** should be placed of level **410** and **Right Of Way Index Title Sheet** on level **411**. Use the ORIGIN snap points to ensure proper placement of the index sheet.



4. Please refer to steps 3 – 9 in the previous section to complete the title sheet.

Title Sheet Levels for Plan Phases

(☑ - required, □ - not required, ☑□ - level can be on or off)

TDOT – Preliminary Title Sheet

☑	**30**	**DESIGN – SCRATCH – User 1**
☑	**32**	**DESIGN – CENTERLINE – Proposed Text**
☑	**61**	**DESIGN – SHEET – Linework**
☑	**62**	**DESIGN – SHEET – Corner Text**
☑	**280**	**DESIGN – SHEET – Plot Shape**
☑	**400**	**DESIGN – TITLE SHEET – TITLE SHEET PROPERTIES – TDOT IDENTIFICATION BLOCK**
□	401	DESIGN – TITLE SHEET – TITLE SHEET PROPERTIES – CONSULTANT IDENTIFICATION BLOCK
☑	**402**	**DESIGN – TITLE SHEET – TITLE SHEET PROPERTIES – TEXT**
☑	**403**	**DESIGN – TITLE SHEET – TITLE SHEET PROPERTIES – LINE WORK**
☑	**405**	**DESIGN – TITLE SHEET – STATE MAP – STATE AND COUNTIES BORDER**
☑	**406**	**DESIGN – TITLE SHEET – STATE MAP – COUNTY NAMES**
☑	**410**	**DESIGN – TITLE SHEET – SHEET AND INDEX – PRELIMINARY PHASE**
□	411	DESIGN – TITLE SHEET – SHEET AND INDEX – RIGHT-OF-WAY PHASE
□	412	DESIGN – TITLE SHEET – SHEET AND INDEX – CONSTRUCTION PHASE
□	413	DESIGN – TITLE SHEET – SHEET AND INDEX – RESURFACING

Other Mapping files

T.D.O.T. Planning Division Maps:

City and Planimetric Maps at scale 1” = 1000’ or 1” = 2000’

Many city and county maps are available in PDF format on T.D.O.T. website at

City Maps

County Maps

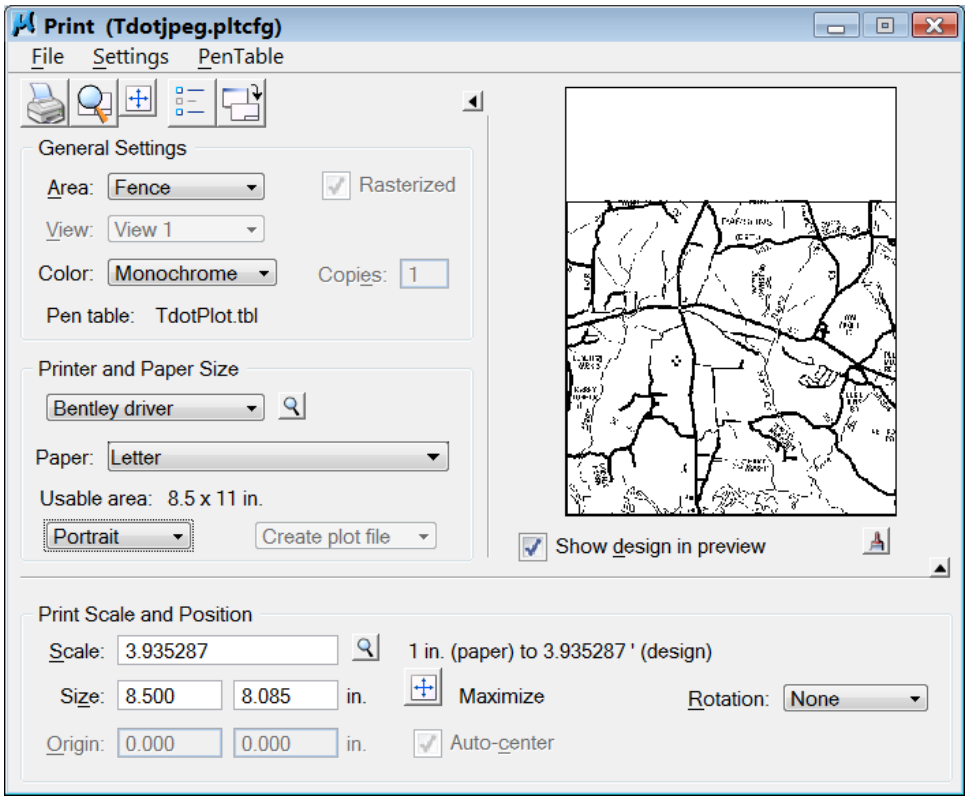
Consultants can request Planning Division map files from the T.D.O.T. website at

https://www.tn.gov/tdot/driver-how-do-i/look-at-or-order-state-maps/maps/map-ordering.html

Using City and Planimetric Maps or Other Non-NAD83 Maps

1. Open the mapping DGN file Use **Coborder.dgn** if there is no DGN for the CIT.
2. If needed, attach the CIT raster file with **Raster Manager**. Click **off** the option to **Place Interactively**.
3. Draw a box the size required for the map area.
   Box size = Inches Plotted times the map scale
   Example: 10” (plotted) x 1000’ (city map and planimetric scale) = 10000**’** box.
4. Set the view attributes to **Line Weights** on, **Data Fields** off, **Fill** on.
5. Place a fence around the box.
6. Use MicroStation Print to create a JPG file. Go to **File > Print**.

   Attach the **Tdotjpeg.pltcfg** plotter driver. Go to **File > Select Bentley Driver**



Go to **File > Print** (first icon) and save the JPG file to the project folder.

In a Design Division Title Sheet DGN file:

7. Draw the map box in your title sheet DGN file (use same size as used to create the JPG file).
8. In MicroStation go to **File > Raster Manager.** In the **Raster Manager** dialog box, go to **File > Attach** and select the map JPG file. Click on the options to **Place Interactively**. Select **OK** and pick two diagonal corners of the map box.
