DATE: November 7, 2019

SUBJECT: 2020-21 Capital Projects Recommendations

ACTION RECOMMENDED: Approval

BACKGROUND INFORMATION

Capital projects are broadly categorized according to project scope and funding source. State appropriations fund <u>capital outlay</u> projects, which consist of new construction or major renovation of existing facilities, as well as <u>capital maintenance</u> projects, which repair and replace systems and structures on existing facilities. The third type of capital project, referred to as a <u>disclosed project</u>, is distinguished by its funding source, which does not include state funding. These projects typically relate to various auxiliary functions, such as residence halls, parking, and athletics. Since the project is funded without state appropriations, an institution signals its intent to initiate the project and seek approval from the State Building Commission. This declaration of intent is disclosed to the Governor and General Assembly.

Agenda Item:

IX.

RECOMMENDATION SUMMARY

Capital Outlay

The capital outlay recommendation for 2020-21 state appropriation totals \$310 million. As detailed in Attachment I, this request includes three projects for the Tennessee Board of Regents (TBR), totaling \$64.6 million, and five projects for the Locally Governed Institutions (LGIs), totaling \$245.6 million.

These projects were identified and prioritized by Commission staff using the selection criteria endorsed. In total, sixteen outlay projects summing to close to \$500 million of state appropriations were submitted to THEC for review, and the selection process resulted in the eight highest ranked projects compiling the staff recommendation. The capital outlay process is focused on the Drive to 55 and ensures that projects are consistent with state and institutional goals. Projects were evaluated on their relationship to state goals and degree production, congruence with an approved Master Plan, space guidelines and facility assessments, program and business plan, and match requirements.

Capital Maintenance

The 2020-21 recommendation for general capital maintenance is \$150 million for 73 projects. As shown in Attachment IV, this includes 32 projects for TBR, totaling \$30.02 million (20.01 percent of the total); 29 projects for the LGIs, totaling \$59.97 million (39.98 percent of total); and 12 projects for the UT system, totaling \$60.01 million (40.01 percent of total). Shares for each governing board are determined annually by the Sherman Dergis Formula, an industry-standard facility reinvestment formula. The formula calculates an annual estimate for capital maintenance for each campus using aggregate size, age, and use of facilities. This request will allow each system to limit increases in deferred maintenance.

In addition to the \$150 million general capital maintenance recommendation, the 2020-21 recommendation includes a special initiative of \$5 million to address a critical need at TSU. This supplemental funding will address campus-wide electrical infrastructure needs.

Tennessee has consistently provided funding for maintenance projects across higher education. Over the last five fiscal years, capital maintenance funding has averaged \$91 million per year. Tennessee continues to be national leader in state support of capital maintenance.

Disclosure of Revenue-Funded Projects

Disclosed projects are funded through institutional funds, the Tennessee State School Bond Authority (TSSBA), auxiliary funds, or sources other than state appropriations. For 2020-21, TBR, the LGIs, and UT are disclosing 33 revenue-and TSSBA-funded projects totaling \$195.2 million. As detailed in Attachment V, the disclosure list includes 5 revenue-funded projects, totaling \$7.0 million, for TBR; 18 projects for the LGIs, totaling \$81.3 million; and 8 projects for the UT system, totaling \$51.1 million. Additionally, \$55.8 million for TSSBA bonds were disclosed.

ATTACHMENT III THEC 2020-21 Capital Outlay Projects Descriptions

THEC Priority	Campus/System Priority	Governing Board	Institution	Project Name	Total Project Cost	State Request	Project Description
1	1	TTU	πυ	Engineering Building	\$ 55,000,000	\$ 43,500,000	The proposed Engineering Building is a student-centered, interdisciplinary space used by all departments in the College of Engineering, comprising more than one-quarter of students at TTU. The Engineering Building is programmed around the concept of intelligent infrastructure, along with open, flexible, and reconfigurable spaces to promote multi-purpose use and collaborative learning. These areas build on TTU's existing strengths in engineering and cybersecurity, as well as a new vehicle engineering concentration and curricula and research related to smart technologies. The building will facilitate increases in engineering enrollment and degree attainment, enhance research and workforce development, and serve education and workforce needs of Tennessee.
2	2	TBR	TCAT Chattanooga	New Advanced Manufacturing Building	\$ 21,900,000	\$ 21,700,000	TCAT Chattanooga will construct a new two-story classroom, lab, student services, and administration building. The building will have high-bay lab space on first floor. Higher ceiling area on first floor will also accommodate community meeting room and building entry. The upper floor will accommodate standard-height lab and classroom space as well as staff offices and administration.
3	1	APSU	APSU	Health Professions Building	\$ 67,735,000	\$ 60,961,500	APSU will consruct a new Health Professions Building to co-locate the School of Nursing, Allied Health Sciences, Health and Human Performance, Psychological Science and Counseling, and Social Work as well as renovate approximately 14,000 SF in the Clement building, McCord building, Dunn Center, and Sundquist building for the creation of classrooms and research lab.
4	3	TBR	Nashville	Clarksville Lab and Classroom Building	\$ 19,000,000	\$ 17,100,000	This project is the construction of Building #2 on the Clarksville Campus. Building #2 will have multiple science and computer labs, flexible classroom space, faculty offices and student study/gathering areas. Included in this project is parking to support the increased student enrollment this building will provide (100 spaces) as well as constructing an access road to an existing light at Wilma Rudolph Blvd which will facilitate motor vehicle safety for students, faculty, and staff.
5	1	UM	UM	STEM Research and Classroom Building	\$ 41,000,000	\$ 32,911,000	UM will construct a new 65,000 SF interdisciplinary STEM building that will include activity based classrooms, faculty offices, laboratories and sponsored research centers. 17,000 square feet of existing space in the adjacent Engineering Building will be renovated to provide enhanced research and instruction space.
6	1	TBR	Columbia and TCAT Dickson	Williamson County Relocation Building 4	\$ 27,500,000	\$ 25,825,000	This project will construct an Academic (Technology) building to meet enrollment growth and workforce demands of the partnerships with TCAT-Dickson. Project will provide for student growth, new programs, and areas for student learning through engagement activities. Specific to this facility is an Information Technology Center for workforce training in software, networking, programming, cyber security, data analytics, help desk, and web development, among other fields. Space will be used for existing programs and growth, innovative programming, student engagement, competency based education, and art communication. Significant to this project is partnership space for faculty offices, lab and lecture space for the collaborative programs offered with TCAT Dickson and others.
7	1	MTSU	MTSU	Applied Engineering Building	\$ 51,000,000	\$ 45,900,000	The Applied Engineering Building (AEB) accomplishes MTSU's goal of providing learning and research spaces that are technology-adept and support innovative pedagogies to meet the professional expectations of students, faculty, and employers in applied engineering. Given a demonstrated increased occupation demand and projected enrollment increases in Engineering Technology (ET) programs, the need for a new facility that and projected enrollment increases in Engineering Technology (ET) programs, the need for a new facility that allows for the expansion of current programs and anticipates program-appropriate spaces for new, developing programs is evident. MTSU's achievement of increased retention and graduation rates, as well as its record of accomplishment for degree completion in ET programs over the past five years provides, additional evidence that undergraduate and graduate program objectives directly align with and help achieve the goals of the Drive to 55.
8	1	ETSU	ETSU	Humanities Building	\$ 71,800,000	\$ 62,286,500	This project will construct a Humanities Building in the campus core adjacent to the Quad and the renovated Culp Student Center, and selectively renovate areas in Rogers-Stout and Burleson Halls. The existing Campus Center Building (CCB) will be demolished and the Humanities Building constructed on the same site. The new Humanities Building will provide space for flexible classrooms, instructional labs, offices, and other spaces as outlined in the Academic Facilities Master Plan. Rogers-Stout Hall will be renovated to provide modern instructional and research space for the social sciences. The renovated Burleson Hall will consist primarily of office spaces to accommodate those moving from CCB. The work will be phased with demolition and new construction completed prior to the backfill renovations.
