

# Tennessee Labor Market Report

**Bill Lee** Governor

**Deniece Thomas**Commissioner

September 2023

## Highlights

**Pages 1-3:** Data and information on part-time workers in Tennessee

Page 4: Tennessee annual average labor force statistics, and September county unemployment rates

Pages 5-6: Monthly Tennessee nonfarm employment, and MSA and city labor force data

**Pages 7-10:** Monthly nonfarm employment statistics for the four largest MSA's and graphs of the unemployment rates

Page 11: Monthly nonfarm employment for each small MSA in Tennessee

Page 12: Monthly consumer price index and hours and earnings for all workers by industry and production workers in manufacturing, graphs of Tennessee unemployment and labor force participation rates

Department of Labor & Workforce Development

#### **Part-time Workers in Tennessee**

The Bureau of Labor Statistics (BLS) publishes annual statistics derived from the Current Population Survey (CPS) on full- and part-time workers by state. People are classified as fullor part-time based on the hours they usually work each week. Workers who usually work less than 35 hours each week are classified as part-time workers. Because people are classified based on the number of hours usually worked each week, some parttime workers may have worked 35 or more hours. Likewise, some full-time workers will have worked under 35 hours.

Measures of people working part-time for economic and noneconomic reasons are based upon a worker's actual hours worked rather than usual work schedule. Economic reasons include slack work such as reduced hours, un-favorable business conditions, inabil-ity to find full-time work and seasonal declines. Those working part-time for economic reasons are also referred to as involuntary part-time workers. Noneconomic reasons include illness or health limitations, childcare problems, personal obligations, in school or training, retirement or Social Security limits on earnings, or having a job where full-time is considered less than 35 hours.

In 2022, in Tennessee, 2,438,000 employed workers (83.1 percent) usually worked full-time (35 hours or more) compared to 496,000 (16.9 percent) who usually worked part-time. Of those who usually worked part-time, and were at work 93.5 percent were at work. Among those at work, 8.2 percent were part-time for economic

reasons with remaining 91.8 percent part-time for noneconomic reasons.

Among all workers, whether at work or not at work, the highest share of parttime workers was in 2013 when over one-fifth (20.1 percent) of workers usually worked part-time. In 2009, during the Great Recession, over 30 percent of those at work who usually worked part-time were doing so for economic reasons. Despite a brief uptick in 2020 due to the COVID-19 pandemic, the proportion of at work part-time workers who are working part-time for economic reasons has steadily declined since the Great Recession to only 8.2 percent in 2022, the lowest share since data began being published in 1997.

Of the 454,000 usual part-time workers who were actually working fewer than 35 weekly hours, 31.9 percent cited "other reasons" as to why they are working part-time. These other reasons include health limitations, seasonal work, and working where a full-time workweek is less than 35 hours. Another 22.2 percent cited school or other training.

Of full-time workers at work, 215,000 (8.8 percent) were actually working fewer than 35 hours. Other reasons also represented the largest share of these workers at 40 percent, followed by vacation or personal time at 35.3 percent.

For more data and information for 2022, see Tables 16 and 23 <u>here</u>.

For data prior to 2022, go here.

The data from all the nonfarm employment estimates tables include all full- and part-time nonfarm wage and salary employees who worked during or received pay for any part of the pay period that includes the 12th of the month. This is a count of jobs by place of work. Agricultural workers, proprietors, self-employed persons, workers in private households, and unpaid family workers are excluded. These numbers may not add due to rounding. Data are based on the 2021 benchmark.
